Media  
Centres

Custom  
Computing

The neat way to add media card and USB capabilities

Are you a computer system builder or enthusiast looking to add internal card and USB functionality to a desktop PC or Server?

The new Dynamode **USB-ALL-INT** is a versatile but fully 3.5 inch wide compliant media bay which will fit into almost any standard 3.5 inch slot found on PCs, workstations, media centres and servers.

Offering multi-memory card read and write capabilities, up to 480Mbps using the USB2.0 standard, the USB-ALL-INT also features an integral USB2.0 interface port, ideal for connecting input devices such as keyboards, mice or joysticks.

Supporting a multitude of memory card formats, including CompactFlash(tm), MemoryStick(tm), SecureDigital(tm) together with their supporting families, the USB-ALL-INT is an ideal solution when replacing, for example, a standard FDU device.

Fully Plug n' Play via its internal USB interface cable which plugs directly on the motherboard\*, the USB-ALL-INT needs no drivers, is easy to install and provides an instant expansion option for Windows(tm), Linux(tm) and other popular operating systems.

## specifications:

3.5-inch fit, multimedia interface bay

Supports up to 30\* memory card formats

High-speed USB2.0 connection - up to 480Mbps

Integral USB1.1/2.0 interface port for input devices

Compatible with CF/MD, SD/MMC, MS/MS Pro and more

Fully Plug n Play with Windows(tm), Linux(tm) and more

Ideal for system builders, gamers and projects

\* Depends on memory vendors designs etc
