

INA-67

USB optical 3-button Mouse with Scroll wheel

Quality control for less than you think.

Introducing the new, low cost USB Optical Mouse for Windows™, Mac™ and other leading Operating Systems.

The **INA-67** is a fully featured Optical mouse with a resolution of 800dpi, ideal for general office, education and business applications. Using a quality Optical sensor means the **INA-67** can work with accuracy on almost all surfaces and gives accurate positioning, especially on high-resolution displays.

Coupled with a comfortable, ambidextrous design means it works on both left and right handed users, with a 3-button design, together with central Scroll Wheel means it's fully compatible with applications such as Browsers and Word processing applications.

Ideal for mobile users and also smaller handed individuals, the **INA-67** is fully Plug n' Play via its USB interface and comes with a generous length USB cable with a robust design.

Featuring..

Premium Optical tracking to 800 dpi (dots per inch)

Works accurately on almost any surface

3-Button design with quiet central Scroll Wheel

Comfortable Ambidextrous $\frac{3}{4}$ design

Ideal for Business, Education and general gaming

Plug n' Play USB interface – driverless operation
