## Take Your Smartphone To Places You Never Thought Of

Need to protect your latest 6-inch smartphone when taking it to less than smartphone friendly places?

The new LMS Data **PH-BAG-WP** is a new generation of completely water protective holsters for almost any smartphone, up to around 6-inches in screen size.

Allowing your device to be fully immersed in water up to around 10 metres in depth (approx, do not exceed depth), allowing taking of HD movies or digital stills under the waves. Not just for the oceans, the PH-BAG-WP is ideal also for less than hospitable places such as locations which are less than clean, ie beaches, factories or even when taking movies in action scenarios, ideal for protecting your screen from scratches and breaks

Complete with supplied lanyard, the new waterproof holster still allows complete touchscreen functionality while being protected.

## specifications:

Ideal for Smartphones up to 6-inches (approx.)\*

100% waterproof technology - up to 10 metres depth

Does not sacrifice use of the devices' touchscreen

Floats in water - if you drop it in, you won't lose it

Take movies and stills under the waves

Prevents ingress of damaging sand, grit and dirt

Also ideal for documents, passports, money etc

Stylish in design, with supplied lanyard

\* Smartphone not supplied
