## Easy-Fit 2.5" Drive Bay And Power For legacy 3.5" Drive Bays

Looking to install your next generation Solid State Disk (SSD) in your 3.5-inch bay PC, Server or other equipment housing?

The new **SSD-KIT** is a complete solution for anyone looking to add smaller, 2.5-inch SSD, HDD or Tape backup systems into an existing 3.5-inch drive bay.

Supplied as a complete kit including all necessary mounting hardware together with both data (SATA) and popular power input (Molex to SATA), the kit allows fine and tailored adjustment of attached drives, courtesy of the slotted design in the pair of alloy brackets..

An ideal and uniquely cost-effective way to add the very latest 2.5-inch form factor storage devices into almost any existing 3.5-inch drive bay you might have.

## specifications:

Fast-fitting 2.5-inch Storage kit for 3.5-inch drive bays

**Supplied with BOTH SATA and Molex-SATA Power Cables**

Slotted alloy bracket design - For accurate placement

**Ideal for PCs, Servers, rackmount equipment etc**

Complete with supplied screw fixings

Storage not included
