

PROHDIRIJ11

PROception

HDMI IR Control Injector.

The **PROHDIRIJ11** allows the injection of an IR control method into a long HDMI cable (up to 20m) without having to change the existing HDMI cable.

Contents:

- IR Blaster (3.5mm jack plug)
- IR Receiver (3.5mm jack plug)
- IR Adaptor Unit x 2

Features:

- The HDMI IR Injector can be used with most equipment including HDMI matrixes, splitters, switches and extenders, Blu-ray, DVD etc...
- No power is required as the system utilizes the sending and receiving devices.
- Switchable IR or CEC (**Consumer Electronics Control**) function.
- Use HDMI minimum standard version 1.2a.
- 5m IR range.
- Plug and play.

Simple and easy to use...

The IR Signal can be transmitted in either direction - simply place the receiver where you want to control from and the blaster where you want the signal to go.

You must set both adaptors to either IR or CEC. When you set the adaptors up it will transmit via the function you have selected.

Super IR Adaptor over HDMI Cable (Max. 20m)
