

SILICONE TAPE

Product Type:

Silicone (Compression) Tape

Specification:

- Size: 25mm x 3m
- Self fusing multi-purpose repair tape
- Insulates to 8000 volts
- Black in colour

Application:

This is a versatile, easy-to-use product. While the bond is permanent; the product leaves absolutely no residue behind when removed. Flexible and durable - the tape is waterproof, insulating (up to 8,000 volts), non-conductive functions between -60°F to +500°F and resists weathering! It can be used around the handles of garden tools, golf clubs, tennis racquets, bicycle handles and more, to extend grip life and support and by wrapping the tape around electrical connections you can ensure airtight weather and waterproofing. If your water pipe or garden hose springs a leak you can quickly seal the hoses and pipes until replacements can be made. Boating enthusiasts will definitely want to keep a reel handy for boat riggings and rope ends. Plumbing issues and emergency O-Rings and Seals are wrapped up quickly and efficiently with this tape. It will seal wet or dry leaks. The tape resists damage from salt water, fresh water and even UV rays! A versatile, easy-to-use product!
