Product information

Introduction of laser marking for EPCOS ring core chokes

Laser marking will be introduced for EPCOS ring core chokes produced in our plant in Szombathely, Hungary, in addition to the currently used inkjet marking. This will improve the legibility.

Affected products

Ordering code
B82721A*
B82721J*
B82721K*

Scheduled date for introduction: March 19, 2018

Both marking technologies will initially be used in parallel. So some deliveries may contain chokes with an inkjet marking as well as chokes with the new laser marking.

The introduction of laser marking will have no effect on the quality and processability of the affected products. Their electrical and mechanical properties remain unchanged.

The data sheets may be downloaded under www.epcos.com/power_chokes
