DeoxIT® DN5 Mini-Spray, D-Series
Contact Cleaner & Rejuvenator

1. Part No.:  
DN5S-2N

2. Container Size:  
40 g (1.4 oz.), adjustable valve (L-M-H)

3. Product Description:
Unique contact cleaner, rejuvenator, conductivity enhancer and lubricant. Dissolves oxidation and corrosion on metal surfaces. Fills in microscopic gaps and reseals surface for better contact to enhance flow of electricity. Chemically improves metal-to-metal connections and contacts. Improves connector performance/reliability. Temperature range: -34 to +200°C.

4. Features/Benefits:
5% Spray - Adjustable Valve, Quick Dry Solvent, Non-Drip, Safe on most plastics.
DeoxIT® D100L concentrate has approximately 20% chemical cleaning action. Excellent cleaning/deoxidizing, good protection, no ozone depletion. Improves conductivity and reduces intermittent connections. Reduces arcing, RFI, wear and abrasion. Cleaner Audio - Clearer Video - Reliable Data.

5. Formulation:
5% DeoxIT® D100L
60-90% SOLSTICE® PF
15-30% TRANS-1,3,3,3-TETRAFLUORO-PROP-1-ENE (CAS 29118-24-9)

6. Which DeoxIT® product do I Use:
△ Use DeoxIT® D-Series contact cleaner on surfaces that have been in service or have visual signs of oxidation. Contains 20% active cleaner.
△ Use DeoxIT® Gold G-Series conditioner on new surfaces, and gold plated surfaces. Ideal for preventing dendrite/fretting corrosion. Protects both surface and base metals. Ideal for critical applications. Contains >1% active cleaner.
△ Use DeoxIT® Shield S-Series to protect surfaces from severe environments (humidity, salts, pollutants, sulfur, etc.). Use on clean surface. Contains 0% active cleaner.
7. Directions for Use:

1. Turn off, unplug the device.
2. Adjust valve (L-M-H). Apply one short burst of DeoxIT® D-Series contact cleaner to contact/connector surface.
   Operate the part/device to help break up oxides and contamination. Wait a few seconds, reapply one short burst. Wait two minutes before turning on equipment. **Test for compatibility before use.**
3. In extreme cases (severe oxidation or corrosion), you may need to leave DeoxIT® on overnight. If that is necessary; apply, then the following day remove any contaminants lifted by DeoxIT® with a lint free swab or cloth on accessible surfaces (If surface is not accessible, repeat step two above.). When surface is clean (no residue on the swab/cloth), finish with a short burst of DeoxIT®, then remove excess leaving a thin layer.
4. If you notice a green or black coloration on the surface (may take a few days) after applying DeoxIT®, this indicates dissolved oxidation (surface was severely oxidized). Follow step “2” above one more time.
5. **For extended protection:** After surface is clean, apply DeoxIT® Gold G-Series for indoor applications or DeoxIT® Shield S-Series for outdoor applications.
6. **NOTE:** To prevent overspray or spraying in unwanted areas, you can always spray onto a lint-free swab or cloth first and then using the swab/cloth apply the DeoxIT® to the connector/contact surface(s).

9. DeoxIT® Essential Reference:

**DeoxIT® D-Series** - Brings old systems back to life!
**DeoxIT® Gold G-Series** - Maintains new system performance!
**DeoxIT® Shield S-Series** - Maintains new system performance for severe environments!
**DeoxIT® Fader F-Series** - Clean, lubricate & protect conductive plastic and carbon compound faders!

**DeoxIT®**

DeoxIT® SHIELD S-Series for outdoor applications.
DeoxIT® Gold G-Series
DeoxIT® D-Series
DeoxIT® Avionics
DeoxIT® Fader F-Series
DeoxIT® Essential Reference:

1. Turn off, unplug the device.

2. Test for compatibility before use.

3. In extreme cases (severe oxidation or corrosion), you may need to leave DeoxIT® on overnight. If that does not work, please contact DeoxIT®.

4. If you notice a green or black coloration on the surface (may take a few days) after applying DeoxIT®, you may want to apply a second thin layer.

5. Use contact cleaner on surfaces that have been in service or have visual signs of oxidation. Contents are not a cleaning agent and contain no active cleaner.

6. Which DeoxIT® product do I Use:

   - For extended protection:
     - DeoxIT® D-Series
     - DeoxIT® Shield S-Series
     - DeoxIT® Gold G-Series

   - For temporary protection:
     - DeoxIT® Avionics
     - DeoxIT® Fader F-Series

   - In extreme cases (severe oxidation or corrosion), you may need to leave DeoxIT® on overnight. If that does not work, please contact DeoxIT®.

7. DeoxIT® is a wetting agent, not a cleaning agent.

8. DeoxIT® is for cleaning and deoxidizing, not for cleaning or deoxidizing. It is not a cleaning agent and contains no active cleaner.

9. IMPORTANT:

   **Material Name**

   | ABS | Excellent | Good |
   | Nylon | Excellent | Good |
   | Lexan | Excellent | Good |
   | HDPE | Good | Good |
   | LDPE | Good | Good |
   | C.E. Phenolic | Excellent | Good |
   | Epoxy | Excellent | Good |
   | Polycarbonate | Excellent | Good |
   | PMMA | Fair | Poor |
   | POM | Excellent | Good |
   | PP | Excellent | Good |
   | PS | Fair | Poor |
   | PTFE | Excellent | Good |
   | PVC | Excellent | Good |
   | TPE/Rubber/Varnish | Poor | Poor |

**Rating, 100% DeoxIT®**: Any of the above that fall into the “Fair” and “Poor” categories should be thoroughly tested for compatibility. They may be compatible, however, it will depend on the manufacturing process of the materials. Acrylics, ABS, and polycarbonate, if under stress, may show slight cracking or crazing damage. Test for compatibility before use. On porous materials; i.e. wood, rubber, cloth, some phenolics, semi-cured materials, no liquid or solvents should be used. Occasionally, DeoxIT® will get onto unwanted surfaces, quickly wipe off surface and usually no damage will occur.

**Rating, with solvents**: Similar to rating above (100% DeoxIT®). However, any rating worse than the 100% DeoxIT® may require additional care. If DeoxIT® is applied to unwanted areas or materials, wipe off surface quickly and usually no damage will occur. Alternatively, apply DeoxIT® onto a lint-free swab or cloth first and then wipe onto desired metal surface.

11. Materials Compatibility (Plastics, Rubber, Elastomeric and Metals):

(Rating: Not compatible, Poor, Fair, Good, Excellent), (N/A = Not applicable (no solvents and propellants)

(* If the product is not 100% DeoxIT®, then the package is rated before and after the solvents/propellants are applied to materials. Compatibility testing is always recommended)
