## Contender Series meter

The moving iron & moving coil panel meters, sizes 1½", 2½", 3½", 4½" are housed in a moulded polycarbonate cases which are suitable for the measurement of AC & DC ammeters, voltmeter & frequency meters utilizing a high torque pivot and jewel movement.

### Special Features

- Surface or window mounting.
- Near linear scale.
- Glass filled polycarbonate housing (UL 94 V-0).
- Knife edge pointer.

## Application

The contender range of analog panel meters offers accurate measurement and indication of most electrical & electronics parameters in industry standard 1½", 2½", 3½", 4½" case sizes. This innovative design features a detachable lower fascia plate which allows the flexibility of either surface or window mounting. The fascia is simply unclipped to achieve the completely flush panel appearance of panel window mounting.

The range offers AC & DC ammeters, voltmeters and frequency meters utilizing a high torque pivot and jewel movement. AC moving coil rectified meters provide 1.5% accuracy of full scale value and features a rear zero adjuster screw for tamper proof installation. AC moving iron meters also provide 1.5% high accuracy and true RMS measurement.

## Functional Areas

- Marine
- Switchgear
- Distribution systems
- Control panels
- Embedded generation
- Energy management
- Building management
- Utility power management
- Process control
- Motor monitoring

## Features

- Measuring and indication of AC amps, volts, frequency and DC signals.
  - Surface or window mounting.
  - Rear zero adjuster on moving coil meters.
  - High torque pivot and jewel movement.
  - True RMS measurement meters.
  - \* AC and DC inputs.
  - Up to 40A DC direct connected.
  - Up to 50A AC direct connected.
- (Not applicable for model 112)\*

## Benefits

- AC moving iron and moving coil mechanisms.
- ANSI standard case sizes.
- Detachable lower fascia plate.
- Easy to modify for distributions.

## Operation

### Moving Coil Meter

These meters offers a centre cored, self shielding moving coil movements using pivots, hairspring and spring jewels. Variations in movement are limited by design. All DC voltmeters are 1000 ohms per volt, moving coil rectified products run at 900 ohms per volt. Milivolt meter use the 5 milliamps/50mV resistance.

### Moving Iron Meter

This clapper type repulsion design utilizes a pivot, hairspring and jewel movement. The bottom jewel is oil filled to provide damping while the top is spring for resilience. All voltmeters are manufactured with internal voltage dropper resistor.

### Frequency Meter

Frequency meters use a 1 mA/350ohm movement driven by an EMC hard frequency conversion circuit.

### Dials, Pointers and Scales

Standard dials are matt white black printed scales and a tubular knife-edge black are balanced within 1% of scale length and feature a highly repeatable flattened arc scale shape, ensuring consistently accurate measurement reading. Dials are interchangeable between the contender range of products using the same input within the published specification of the meter. Options for non standard customer specific dials are available upon request.
