LIMITED WARRANTY AND LIMITATION OF LIABILITY

This Fluke product will be free from defects in material and workmanship for two years from the date of purchase. This warranty does not cover fuses, disposable batteries, or damage from accident, neglect, misuse, alteration, contamination, or abnormal conditions of operation or handling. Resellers are not authorized to extend any other warranty on Fluke's behalf. To obtain service during the warranty period, contact your nearest Fluke authorized service center to obtain return authorization information, then send the product to that Service Center with a description of the problem.

THIS WARRANTY IS YOUR ONLY REMEDY. NO OTHER WARRANTIES, SUCH AS FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSED OR IMPLIED. FLUKE IS NOT LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LOSSES, ARISING FROM ANY CAUSE OR THEORY. Since some states or countries do not allow the exclusion or limitation of an implied warranty or of incidental or consequential damages, this limitation of liability may not apply to you.

**Introduction**

The 820-2 Stroboscope (the Product) uses an adjustable LED strobe light to show the movement of mechanical parts. The frequency range is 30 flashes per minute (FPM) to 300,000 FPM.

**How to Contact Fluke**

To contact Fluke, call one of the following telephone numbers:

- Technical Support USA: 1-800-44-FLUKE (1-800-443-5853)
- Calibration/Repair USA: 1-888-99-FLUKE (1-888-993-5853)
- Canada: 1-800-36-FLUKE (1-800-363-5853)
- Europe: +31 402-675-200
- Japan: +81-3-6714-3114
- Singapore: +65-6799-5566
- Anywhere in the world: +1-425-446-5500

Go to [www.fluke.com](http://www.fluke.com) to register your product, download manuals, and find more information.

Warning identifies conditions and procedures that are dangerous to the user.

⚠️ Warning

To prevent possible personal injury:

- Read all safety information before you use the Product.
- Carefully read all instructions.
- Use the Product only as specified, or the protection supplied by the Product can be compromised.
- Do not touch the moving target object when you use the Product. In stroboscopic light, object movement can appear still or slowed.
- Do not use the Product around explosive gas, vapor, or in damp or wet environments.
- Do not use the Product around personnel that are susceptible to epileptic seizures.
- Do not use the Product if it is damaged.
**Symbols**

Symbols used in the manual or on the Product are shown in Table 1.

Standard Equipment

If an item below is missing or damaged, contact Fluke. The Product comes with:

- Quick Reference Guide
- Safety Information
- International Registration Card
- Statement of Quality
- Hard Case
- AA Batteries (3)
- External Trigger Input Connector
Features

Figure 1, Table 2, and Table 3 show the Product.

**Auto Off**

To conserve battery power, the Product turns off after 15 minutes of non-use.

**Low-Battery Indicator**

The low-battery indicator is shown when the battery is low. When the low-battery indicator shows ( ), change the batteries.
The subsequent sections tell you how to use the Product.

Push \( \text{囲} \) to turn on the Product. Push and hold \( \text{囲} \) for 2 seconds to turn off the Product.

**Default Settings**

To set the Product to the default settings, push and hold \( \text{囲} \) and \( \text{囲} \). The default settings are:

- 1000 FPM
- 16.7 Hz
- 333 Pulse \( \mu \text{s} \)
- 2.0 Pulse deg
- 0 Delay ms
- 0 Phase deg
- External pulse divider = 1
- External trigger edge = 0 (positive)
Setup Menu

When you push SETUP, the display shows the Setup menu. From the Setup menu, you can change these parameters:

- **Hz setting** – Adjust the flashes per seconds in Hz.
- **Pulse width in μs (µs)** – Adjust the flash intensity in microseconds of pulse width.
- **Pulse width in degrees (°)** – Adjust the flash intensity in degrees of flash rate.
- **Delay in ms (ms)** – Adjust the delay time in milliseconds between internal trigger and flash. Precise adjustments of the observation position can be made with this setting.
- **Phase degree (°)** – Adjust the degrees of phase shift between internal trigger and flash. Precise adjustments of the observation position can be made with this setting.
- **External trigger pulse divider (n)** – Set the external trigger divider, to adjust the flash rate.
- **External trigger edge (0/1)** – Set the external trigger edge to either positive (0) or negative (1).

Push +/- and 8 to make adjustments to each parameter. Push SETUP to change parameters and to enter and exit the Setup menu.

Range

When the external trigger is >5 kHz, -OL- shows on the display.

When the external trigger is <0.5 Hz, -UL- shows on the display.
**External Trigger**

Use the External Trigger Input Connector for outside trigger sources. When the Connector is plugged into the Product (see Figure 1, item 4) the Product displays **External Trigger**. Table 3 shows what options are available when an external trigger is used. For Connector polarity information, see Figure 2.

![Figure 2. External Trigger Connector Polarity](image)

**Maintenance**

⚠️ **Caution**

The Product contains no user-serviceable parts. To prevent damage to the Product, do not open the case. For service, see “How to Contact Fluke”.
How to Clean the Product
Regularly clean the case with a damp cloth and mild detergent.

⚠️ Caution
To prevent damage to the Product, do not use abrasives or solvents to clean the Product case.

How to Change the Batteries
The Product is energized by three AA (LR6) batteries. When the low battery symbol shows on the display (.consumer), replace the batteries. See Figure 3.

⚠️ Caution
To prevent damage to the Product:
- Be sure that the battery polarity is correct to prevent battery leakage.
- Remove batteries to prevent battery leakage and damage to the Product if it is not used for an extended period.

Specifications

Mechanical Specifications
Size (H x W x L) .................. 5.71 cm x 6.09 cm x 19.05 cm  
(2.25 in x 2.4 in x 7.5 in)
Weight... ............................ 0.24 kg (0.53 lb)

Environmental Specifications
Operating Temperature ....... 0 °C to +45 °C (+32 °F to +113 °F)
Storage Temperature .......... -10 °C to +50 °C (+14 °F to +122 °F)
Operating Humidity ............ Non-condensing, < +50 °F (< +10 °C)
                          90 %RH, +10 °C to +30 °C  
                          (+50 °F to +86 °F)
                          75 %RH, +30 °C to +40 °C  
                          (+86 °F to +104 °F)
                          45 %RH, +40 °C to +50 °C  
                          (+104 °F to +122 °F)
(Without Condensation)
Absorption/Corrosion........ +30 °C (+86 °F), 95 %RH, 5 days
Product functions normally
Operating Altitude .......... 2,000 m
Storage Altitude .......... 12,000 m
Vibration......................... MIL-PRF-28800F Class 2
Stroboscope
Specifications

Safety ......................... IEC 61010-1:Pollution Degree 2

Electromagnetic
Environment ..................... IEC 61326-1:Industrial

Group 1 ISM equipment: group 1 contains all ISM equipment in which there is intentionally generated and/or used conductively coupled radio-frequency energy which is necessary for the internal functioning of the equipment itself.

Class A equipment is suitable for use in non-domestic locations and/or directly connected to a low-voltage power supply network. Class A equipment may have potential difficulties in ensuring electromagnetic compatibility in other environments, due to conducted as well as radiated disturbances.

Electromagnetic
Compatibility  ................. Applies to use in Korea only.
Class A Equipment (Industrial Broadcasting & Communication Equipment) [1]

[1] This product meets requirements for industrial (Class A) electromagnetic wave equipment and the seller or user should take notice of it. This Equipment is intended for use in business environments and is not to be used in homes.
820-2
Users Manual

Miscellaneous Specifications
Battery Type..................3 x AA Alkaline LR6
Flash Frequency
  Range ..........................30 FPM to 300,000 FPM
  0.5 Hz to 5000 Hz
  Accuracy ......................0.02 %
  Resolution ....................30 FPM to 999 FPM = 0.1
  1000 FPM to 300,000 FPM = 1
  0.5 Hz to 999 Hz = 0.1
  1000 Hz to 5000 Hz = 1
Frequency Setting ..........FPM or Hz
Flash Pulse
  Duration .....................Adjustable in μs or degrees
  Delay .........................Adjustable in ms or degrees
Light
  Color ..........................Approx. 6500 K
  Emission Output ...........4800 lx @ 6000 FPM
  30 cm (11.9 in) at 3°
External Trigger
  Method .........................Connector to externally control trigger
  Frequency Range ..........0.5 Hz to 5000 Hz
  High Level ...................3 V to 32 V
  Low Level ......................<1 V
  Minimum Pulse Width ....50 μs Connection
