**Discontinuation of a product**  
**Please forward this information to your electrical engineering departments and/or customers**

Dear Sir or Madam

It is always our ambition to offer you state-of-the-art and up-to-date products for your application. For this reason, it is necessary for economical or technical reasons to regularly check our product portfolio and to adjust it according to the product life cycle.

We herewith discontinue the articles in the attached list at the 1<sup>st</sup> of April 2018. WE discontinue turned contacts of series RC and SM. These contacts can be substituted directly. All crimping pliers can still be used for the substitute articles, but please pay attention to the crimp settings, as they may vary. This discontinuation also affects connectors, which are delivered with crimp contacts. These articles can also be found in the enclosed article list.

In order to cover your foreseeable demand of replacement parts, you will still be able to order the mentioned products until 01.04.19 (Last Order). The last shipment will be by 30.04.2019 at the latest (Last Shipment).

It will be our pleasure to support you in case of any changeover of your machine or system projection. If you have any questions or would like to make an appointment, please contact us. We look forward to supporting you.

We thank you for your understanding and look forward to continue our good cooperation.

Kind regards

PHOENIX CONTACT Connector Technology GmbH
