Thermal anemometer operated with smartphone

testo 405i

Compact professional measuring instrument from the Testo Smart Probes series, for use with smartphones/tablets

- Measurement of air flow velocity, temperature and volume flow
- Easy configuration (dimensions and geometry) of the duct cross-section for determining volume flow
- Measurement data analyzed and sent via testo Smart Probes App
- Telescopic shaft, extendable up to 400 mm
- Space-saving and easy to transport

The hot-wire anemometer testo 405i, in combination with a smartphone or tablet, is a compact measuring instrument for air flow velocities, temperatures and volume flows. Equipped with a telescopic shaft, extendable to 400 mm, it allows flexible applications in rooms and ducts. Via the testo Smart Probes App installed on the end device, users can comfortably read off their measurement values, configure volume flow measurements quickly and easily, and reliably determine timed and multi-point mean values.

The measurement protocols can then be directly sent as PDF or Excel files. In combination with the thermal hygrometer testo 605i, the testo 405i is suitable for determining cooling or heating performance.

testo Smart Probes App

The App turns your smartphone/tablet into the display of the testo 405i. The operation of the measuring instrument as well as the display of the measurement values take place by Bluetooth via the Testo Smart Probes App on your smartphone or tablet – independently of the measurement location. In addition to this, you can use the App to create measurement reports, add photos and comments to these, and send them by e-mail. For iOS and Android.
