## LulzBot Mini Tool Head v2

---

The LulzBot Mini Tool Head is an assembled complete assembly for your LulzBot Mini 3D printer. We use the popular Wade's Accessible Reloaded extruder & features the LulzBot Hexagon all-metal hot end (capable of temperatures up to 300C) mounted on our LulzBot Mini Extruder Mount. This tool head ships assembled, aligned and with all the connections terminated for ease of installation onto the LulzBot Mini.

*Works with:* LulzBot Mini

Features:

Developed in partnership with the Open Source Hardware community, this tool head has undergone countless hours of testing and is ready for you to put it to work. You will be glad you made the upgrade, too! We are proud to say this is the most reliable tool head we've ever produced.

Specifications:

Recommended filament diameter: 3mm

Hot end temperature range: 120°C - 300°C
