

Part Number: TMC8670-EVAL

EtherCAT Motion Controller Evaluation Kit

The TMC8670-EVAL allows you to explore all functions of the [TMC8670-BI](#).

The TMC8670-EVAL-KIT is a set of one power stage [TMC-UPS-2A24V-EVAL](#), an [Eselsbrücke](#) bridge board and one TMC8670-EVAL driver board. It allows for a quick and simple start within only minutes to make your motor turning, while still providing full access to all registers and full functionality and diagnostics.
