number:

- L-keys for hexagonal socket screws
- · Hex-Plus allows socket head screws to live longer
- · BlackLaser for high corrosion protection and long service life
- L-keys are quickly to hand thanks to their size markings
- · Wear-resistant clip material for enhanced durability

High quality L-key set for imperial hexagonal socket screws in a practical clip fastener out of wear-resistant material, enabling secure storage of the Lkeys as well as simple removal. Hex-Plus profile: offers a larger contact surface within the screw head. This reduces the notching effects to a minimum and almost completely eliminates the risk of destroying the screw recess. The ball-end on the long arm allows for reliable working even in difficult installation situations. The BlackLaser surface treatment provides outstanding surface protection, even against corrosion, and a long service life. The tools are quickly to hand thanks to the laser-engraved and thereby wear-resistant size markings on the L-keys.

# L-Keys

We questioned the classic L-key design, since all too often the screw head recess is rounded out, meaning screws can no longer be tightened or loosened – and so the user finds the L-key slipping out of the recess. Wera Hex-Plus tools have a larger contact surface in the screw head. The notching effects are reduced and thereby the deformation of the screws. At the same time, as much as 20 % more torque can be applied.

#### **Hex-Plus**

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

# Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

# Surface protection

L-keys with BlackLaser surface treatment for outstanding surface protection and long service life. High corrosion protection.

## Size identification

# Secure hold and easy removal

The size of each L-keys has been engraved by a laser. In addition SPKL L-keys have a colour coding according to sizes – for simple and rapid accessing of the required tool. Making it easy to find the right tool.

The wear-resistant clip material ensures that the L-keys are securely held yet are easy to remove.
