

Tango 14

Low Profile Quad Band GSM & 3G Screw Mount Antenna

Key Features

- Low Profile Design, 18mm
- Quad Band GSM/GPRS & 3G
- Screw/Through-Hole Mount Antenna
- 3.68 dBi Peak Gain

General Description

The TANGO 14 is a low profile, robust and vandal resistant antenna suitable for equipment like vending machines.

It comes with a double sided sticky pad shaped to the antenna and forms a good seal between antenna and equipment it is mounted to.

The Tango 14 is designed for covert applications where the user wishes to keep their antenna out of sight from unwanted eyes. Operating on GSM & 3G, the Tango 14 works well with various kinds of telemetry equipment, such as Siretta's Zeta and the Zoom terminal series.

The antenna is available with different cable lengths and connector types for volume orders.

Additional Considerations

- Compatible worldwide with any cellular GSM application
- Perfect for covert applications
- Vandal resistant
- Dual mounting – adhesive and screw mount
