

## Scotch-Brite™ Clean and Prep Sponge Part Number: 07439

### Product Details

- Non-woven vinyl web stands up to tough cleaning tasks
- Non-woven web is ideal for scuffing auto and aircraft surfaces
- Flexible sponge conforms to irregular or contoured shapes
- Double-sided sponge adds durability and longer service life
- Use dry, with soap and water, or with solvents
- Will not rust or splinter—a good replacement for steel wool

The Scotch-Brite™ Clean and Prep Sponge is a great all-purpose scrubbing sponge to have on hand for many different cleaning tasks or for scuffing painted surfaces. The non-woven nylon web can tackle tough debris without tearing or splintering, yet offers flexibility for cleaning intricate or contoured surfaces.

#### Takes Away Stubborn Residues or Scuffs Painted Surfaces

We laminated both sides of the sponge with [Scotch-Brite™](#) non-woven material for extra sturdiness and extended use. This durable sponge is just what you need for heavy duty cleaning or scuffing by hand. Use it for scuffing and cleaning auto and aircraft surfaces, spot scrubbing on carpet, and removing sticky substances like bugs or tree sap. It is even recommended for cleaning leather or vinyl.

#### Use Wet or Dry, Again and Again

This sponge works dry or wet, with soap and water, or with other cleaning compounds. And unlike steel wool, the Clean and Prep Sponge will never rust. Simply clean, rinse and repeat.

#### The Scotch-Brite™ Advantage

[Scotch-Brite™](#) is a unique surface conditioning product with abrasives incorporated into non-woven nylon fibers. Combining abrasives with the fibers creates an abrasive system that delivers consistent results over the life of the product. The open web material is load resistant and keeps the abrasive minerals cutting at high performance by limiting clogging of the nylon fibers.
