## Product Specifications

The only substance harder than tungsten carbide is diamond. Dremel tungsten carbide Cutters are ideal for shaping, smoothing or removing material from especially hard substances, like cast iron, nonferrous metals, and hard woods. The 1/8-inch tungsten carbide cutter can be used in virtually any Dremel rotary tool. Please [click here](#) to see the recommended speed settings for our accessories.

- Shapes, smooths or grinds especially hard materials including: hardened steel, stainless steel, cast iron, nonferrous metals, fired ceramics, plastics and hard woods
- A high-speed cutter made of tungsten carbide, the hardest material next to diamonds
- Use higher speeds for hard woods, slower speeds for metals and very slow speeds for plastics
- Use the sides of the cutter (rather than the tip) for effective cutting
