**BUY NOW**

## Product Specifications

The 426 cut-off wheel is reinforced with fiberglass for increased durability and used for cutting metal including hardened steel. Cut-off wheels make it easy to cut bolts or screws or make slots in rusted or stripped bolts and screws for removal with a screwdriver. Please [click here](#) to see the recommended speed settings for our accessories.

- Ideal for cutting, grooving and trimming all kinds of metal, may also be used on other materials-including thin wood, plastics and ceramics
- Cut-off wheels make it easy to cut bolts or screws or make slots in rusted or stripped bolts and screws for removal with a screwdriver
- Fibers for reinforcement
- Speed feed dispenser
