		Customs tariff number:	82079030

- Upright positionable Bit-Checks convince due to their functionality in a minimum of space
- Universal holder with quick-release chuck for rapid bit change
- Torsion design against premature wear
- Tough viscous bits for universal use
- In handy and robust Bit-Check

Robust Bit-Check by Wera. Bit-Checks provide a quick overview of the tools available. Bits not needed are simply reinserted into the set and do not get lost. Simple transportation e.g. in the shirt pocket. Includes universal holder with strong permanent magnet and quick-release chuck for the takeup of bits with ¼" hexagon head drive as per DIN ISO 1173-C 6.3. Can be inserted in the power screwdriver or for use in the chuck of the electric drill. Comes with Torsion bits to combat premature wear; tough viscous for universal use. **Bit-Checks / Bit-Safes Universal**

At the workplace

TZ-Bits

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

TZ-Bits are tough viscous bits with a torsion zone. Torsion bits absorb the damaging peak torque loads in the torsion zone. This prevents premature wear and enhances the service life of the bits.

For a firm, wobble-free connection between holder and bit with quickrelease action. Simply push sleeve forward to change bits. The magnetic design enables simplified positioning of the screw.

Bit Ranges

We have had bit ranges in our programme for many years now. In 2016, we put a question mark against everything and came up with a game changer. We wanted bit ranges with bits whose profiles and sizes could be more easily recognised. We wanted bit ranges that were as compact as possible and which were Wera-like at a first glance. We wanted bit ranges with bits that could be removed and reinserted more easily. We wanted bit ranges with as little weight as possible. The new multicomponent Bit-Checks satisfy these requirements; the soft material in the lower section of the Bit-Checks ensures that the bits are firmly held yet easy to remove.
