

1567 TORX® B0 Screwdriver for tamper-proof TORX® screws, TX 15 x 80 mm

ESD Series

EAN:	4013288039231	Size:	178x33x33 mm
Part number:	05030127001	Weight:	56 g
Article number:	1567 TORX® B0	Country of origin:	CZ
		Customs tariff number:	82054000

- For TORX® socket screws with safety pin
- ESD-safe tool thanks to surface resistance of $< 10^9 \text{ Ohm}$
- Multi-component Kraftform Micro handle with anti-roll feature and swivel cap
- For TORX® socket screws with safety pin
- The Wera Black Point tip offers an exact fit and optimum corrosion protection

ESD-safe Micro screwdriver. Dependable protection against electrostatic energy and associated damage. TORX® B0 screws have a protruding pin in their drive profile. This effectively prevents any unauthorised loosening since such screws cannot be actuated with “normal” TORX® tools. Only special TORX® B0 tools have a corresponding bore hole for the take-up of the pin. Rapid twisting results from fixing the hand on the swivel cap and by rotating the fast-turning zone just below. This makes time-consuming grip adjustments unnecessary. Power zones with integrated soft sections ensure the transfer of high loosening and tightening torque; a precision zone provides for the right rotation angle during fine adjustment work. The Black Point tip offers optimised corrosion protection and an exact fit.

ESD Series

Wera ESD Tools

When doing screwdriving jobs on electronic components (like e.g. smartphones and tablet PCs), there should be no electrostatic discharge as this could cause malfunctions and a complete failure. Therefore, tools that are secure against electrostatic discharge are indispensable.

The requirements for ESD-safe screwdrivers are specified in the European standard DIN EN 61340-5-1. This standard also includes a handle that has to be out of a defined conductive material. The Wera products in the ESD series satisfy these standards and the even more stringent requirements demanded by some technology companies.

High protection

The electric surface resistance of the Wera ESD material is $\leq 10^9$ ohm. This securely protects components against electrostatic energy and associated damage.

Wera Black Point tip

The Wera Black Point tip and a refined hardening process ensure long service life of the tip, improved corrosion protection and an exact fit.

Further versions in this product family:
