For Halfmoon and HIOS Bits

Simple setting

Wera's adjustable torque screwdrivers allow variable torque settings with maximum precision and ensure that the user gets the very best results in the familiar Wera design with superior ergonomics.

The requirements for ESD-safe screwdrivers are specified in the European standard DIN EN 61340-5-1. This standard also includes a handle that has to be out of a defined conductive material. The Wera products in the ESD series satisfy these standards and the even more stringent requirements demanded by some technology companies.

Features a combination bitholder for both bits with Halfmoon and bits with HIOS drive.

Simple setting of the required torque by hand.

Attachable magnifying glass

Measurement accuracy

Versatile

Unlimited torque

Articles 1430 ESD and 1431 ESD, all come with a magnifying glass. This can be easily attached on to the scale, dramatically improving visibility.
