

# New Product Introduction

## 2JCIE-BU Environment Sensor, USB Type

### FEATURES:

- Wireless sensor using low energy Bluetooth 4.2
- Multiple sensors (such as temperature, humidity, light, barometric pressure, sound noise), in one package, provide various information at the same time
- Information loss is prevented by saving the date inside of the built-in memory even if communication is not established
- Small dimension packaging, allowing use anywhere

### APPLICATIONS:

- Smart home (example- room monitor for comfortable sleep conditions)
- Building (example- office environment monitor)
- Weather conditions
- Real estate
