HI-IMPACT"

Complete Communication Solution for Harsh Environments.

From the most severe industrial to punishing commercial, HI-IMPACT™ System answers the call . . .

In today's competitive market the ability to access "Real Time" data is critical to customer satisfaction. "Real-Time" data supports the global trend of e-commerce, quick-response and vendormanaged inventory systems. Customers and suppliers now have the ability to look at all points in the supply chain, from raw material to finished goods. This ultimately improves responsiveness and provides a competitive edge to be best in class.

The global acceptance of Ethernet protocol has pushed RJ45 connectors from the corporate office to the more demanding industrial and harsh commercial environments. This trend has created the need for a more dynamic and robust solution. In these environments the typical mated connection may corrode, wear, cloq with debris, and eventually fail. High maintenance costs, downtime and critical failure are the results, where dust, moisture, temperature extremes, EMI, and vibration are commonplace.

Hubbell's HI-IMPACT™ system is more than just a connection. It is a complete end-to-end communications solution designed to solve problems in the most severe industrial to punishing commercial environments.

. . . Spanning applications from A to Z.

The **H**ubbell **A**pplications **R**ating **S**ystem for **H**arsh **E**nvironments (HARSH-e) simplifies specifying the right product by categorizing environmental conditions into three classes – severe, harsh and tough.

For each environmental condition, identify the level that best describes your application in the HARSH-e table.

The most severe environmental condition dictates the HARSH-e level for your application.

See the page for the corresponding HARSH-e level for the product set and system components.

HARSH- Hubbell Application Rating System for Harsh Environments

	Application Severe	2 Application Harsh	1 Application Tough
Dust	Enclosures: NEMA 4X Connectors: IP67 and IP66 Totally protected against dust (Dust-tight)	Enclosures: NEMA 4/12/13 Connectors: IP67 and IP66 Protected against dust, Objects greater than 1 mm	Enclosures: NEMA 3R Connectors: IP43 Objects greater than 1 mm i.e., tools, wires, small wires
Water	Enclosures: NEMA 4X Connectors: IP67 and IP66 Immersion and strong pressure jets	Enclosures: NEMA 4/12/13 Connectors: IP67 and IP66 Protected against strong and low pressure jets	Enclosures: NEMA 3R Connectors: IP43 Protected against sprays of water to 60° from vertical
Corrosion	Enclosures: NEMA 4X Stainless Steel: Dust, water and corrosive liquids Connectors: PBT Common oils, chemicals and cleaning agents	Enclosures: NEMA 4/12/13 Ice, dust, water, non-corrosive liquids Connectors: PBT Common oils	Enclosures: NEMA 3R Falling rain, sleet Connectors: N/A
Impact	Enclosures: 14 ga., 304 SS Connector Housing: PBT	Enclosures: 14 ga., steel Connector Housing: PBT	Enclosures: 14 ga., steel Connectors: Thermoplastic
Tamper	Enclosures: Protected, secured and locked	Enclosures: Protected, and optional locked	Enclosures: Protected, but not secured

CONNECTOR SPECIFICATIONS

Environmental

• Ingress Protection: IP67 and IP66 (dust and water) • Corrosion: Resistant to most common chemicals,

cleaning agents and oils

• UV: UV resistant (HI-IMPACT Housing)

• Temperature Range: TIA/EIA-568-B.2

TIA/TR 42.9 (product pending)

Mechanical

Vibration

- Frequency Range: 10-500Hz - Acceleration: • Mating Cycles: 750 minimum

• UL 1863 listed

Material

• Connector Housing: PBT, UL94V-0

Beryllium copper with a minimum of • Nose Contacts:

50 micro-inch gold plating over

nickel under plating

• IDC 110 Contacts: Phosphor bronze with 100 micro-inch tin

lead 60/40 plating over nickel under plating

Electrical

• ANSI/TIA/EIA-568-B.2-1 (Category 6)

• ANSI/TIA/EIA-568-B.2 (Category 5e)

• Supports TIA/TR42.9 Industrial Draft

• Supports 4 times IEEE 802.3af DTE power specifications

• Exceeds IEEE 802.3ab Gigabit specifications to < 1 * 10-13
