

Ultra Small Surface Mount Coaxial Connectors 1.4mm or 1.65mm Mated Height

W.FL Series

Fig.1

■ Features

1. Nominal mated height of 1.4mm or 1.65mm (Max. 1.55 or 1.85mm)(Fig.2)

2. Small board footprint

The W.FL Series is about 55% smaller than our U.FL Series connector and only uses 3.4mm² of PCB space. The PCB layout for the W.FL Series is the same as for W.FL2 and X.FL Series.

Note: This product is not compatible with W.FL2 Series and X.FL Series. (Fig.1)

3. Extremely light weight

Receptacle: 5.6 mg

Right-angle plug: 18.6 mg(040), 28.2mg(062)

4. Frequency range up to 6 GHz

DC to 3 GHz : V.S.W.R. of 1.3 max.

3 GHz to 6 GHz: V.S.W.R. of 1.4 max.

5. Automatic board placement

Packaged on tape-and-reel the receptacles can be placed with vacuum nozzles of the automatic placement equipment.

6. Plugs are terminated with ultra-fine coaxial (fluorinated resin insulated) cable

The use of ultra-fine coaxial (fluorinated resin insulated) cables on these connectors offer the ability to complete connections in small, confined spaces with a smooth, easy operation.

7. Simple connector mating / unmating

Use of the available mating/un-mating tools assures correct connection/disconnection of the plug and receptacle.

8. Halogen-free*(Receptacle, Plug(HF type))

◆ Precautions

1. Plug

<p>(1) Mating / unmating</p>	<p>• Unmating Insert both ends of the extraction tool under the plug (from the direction opposite to the Cable termination), as shown and pull-up in the direction perpendicular to the mounting surface of the receptacle.</p> <p>● Recommended the use of the extraction tool for unmating. Any attempt of unmating by pulling on the cable may result in damage and affect the mechanical / electrical performance.</p>  <p>• Mating</p> <ol style="list-style-type: none"> Align the mating tool W.FL-LP-IN or the mating end of the tool over the plug end of the cable assembly. Firmly place the tool over the plug until it is secured in the tool. Place the plug cable assembly (held in the tool) over the corresponding receptacle. Assuring that the plug and receptacle are aligned press-down perpendicular to the mounting surface until both connectors are fully mated. Remove the mating tool by carefully pulling it up. Removal of the tool.  <p>Plug pickup → Insertion to a receptacle → Removal of the tool</p>
<p>(2) Pull forces on the cable after connectors are mated</p>	<p>After the connectors are mating, do not apply a load to the cable in excess of the values indicated in the diagram.</p> 
<p>(3) Precautions</p>	<p>Do not twist connectors excessively during mating / unmating.</p>

2. Receptacle

<p>(1) Recommended reflow temperature profile</p>	 <ol style="list-style-type: none"> The temperature of the printed circuit board surface temperature at the points of contact with the terminals. Reflow soldering should be performed at a printed circuit surface temperature of 250°C max. In individual applications the actual temperature may vary, depending on the solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.
<p>(2) Recommended metal mask thickness</p>	<p>0.1mm to 0.12mm</p>
<p>(3) Reflow cycles</p>	<p>2 times</p>

3. Operating environment and storage conditions

<p>(1) Operating environment</p>	<p>The connectors are not designed to operate in the following environments:</p> <ul style="list-style-type: none"> Exposed to a excessive amounts of fine particles and dust Regions and places having a high density of sulfur dioxide, hydrogen sulfide, nitrogen dioxide or other corrosive gasses. Environments having large rapid variations in temperature.
<p>(2) Storage conditions - Receptacle</p>	<p>Store in the Hirose Electric packaging. Temperature : -10 to +40°C, Humidity : 85% max. Use within 6 months of delivery. Receptacles for which the storage period has elapsed must be tested for solderability to the PC board mounting surface.</p>
