Wireless Multizone Audio Distribution System

AS1 Wireless Stereo Distribution Streamer

Quick Start Guide

Stream. Control. Entertain.

200 New Highway * Amityville, NY 11701 * www.SpecoTech.com

1 | Page

a-live

Introduction

This WiFi enabled digital streamer has great performance and is flexible enough to satisfy picky residential audio enthusiasts while simultaneously meeting the demands of commercial installations. With the free iOS and Android applications you can easily control your smart audio system to stream and distribute music in up to 12 zones. You can stream the same music to all zones or different music to different zones, no matter if the music is from local storage like cell phone memory, NAS, USB flash disk and hard disk or from online streaming services such as Spotify, Tidal, TuneIn, iHeartRadio, Napster, etc.

In This Box

- AS1 x1
- Quick Start Guide x1
- Power supply x1
- RCA cable x2
- Antennas x1

What You Need For Installation

- Wifi router
- Amplifier with connected speakers (Commercial 70V amplifier or Residential amplifier, or active speaker)
- Mobile device or computer

a-live

Interface and Functions

- (1) WiFi Antenna: Used to connect to WiFi
- 2 Reset: Used to reset the device when if you are having problems with your WiFi connection
- ③ LED: Indicates the status of the device

Blinking White: Searching for a network connection

Solid white: Power on, Network connected, WiFi and USB streaming

Solid green: Line in streaming

- ④ Optical: Used to provide 2.1 digital output to other devices such as an amplifier
- 5 Coaxial: Used to provide coaxial output to other devices such as an amplifier
- 6 Line out: Used to provide an analog output to other devices such as a receiver or amplifier

<u>a-live</u>

Interface and Functions (Cont.)

- Network connector: RJ45 used to connect to a wired Ethernet network
- 8 USB input: Used to connect to local storage devices such as thumb drive
- 9 Line input: Analog input used to connect audio devices via RCA cable
- 10 Power input: Used to connect the power adaptor

How it works

Installation Guide

1. Unpack your system

Verify all accessories are included in your box.

2. Install your system

Place your streamer at a safe and proper location. An integrated mounting bracket allows mounting to a wall or surface, but we suggest making sure you complete all installation steps before permanently mounting.

3. Connect your system

Power connection

Power the streamer with the power adaptor included in the accessories. It is recommended to connect the adapter into the streamer first, and then plug the AC plug into your wall or other outlet.

Audio Connection

Using the included RCA cable, connect your AS1 to the Line Input on your 70V amplifier, or use one of the other outputs with an optional cable to connect to a different source.

4. Download the App

Download the **a-live** application from the App Store for iOS and Google Play for Android.

5. Configure

Option 1-Configuration via app

-Connect your Mobile Device to your Wifi Network

-Open the application> press Add Device(+)>choose settings> choose the a-live_xxxx hotspot> after connecting, press the 'turn back' on your WLAN settings> the app will jump to the configuration step>choose the 2.4G network and enter the password>wait for the device to be configured.

a-live

Option 2- Configuration via Web console

-1. Power the device.

- -2. Choose the hotspot(**a-live_xxxx**) in the WiFi settings on your cell phone or computer and connect.
- -3. Open your browser and enter 10.10.10.254 in the address bar.

-4. Go for WiFi>choose your 2.4G router>enter the password> click connect> wait for the device to be configured.

Option 3-Connection via LAN

-Power the device

-Plug in the wired cable to the RJ45 Ethernet, the device will show on the app in about 10 seconds.

Playback

Your Device List will show all available zones. Press a zone to see the information on the current source. While on the view for the source, swipe right to reveal the available sources. From there, you can select what sou

You also have the ability to combine zones so that each zone is playing the same source at the same time.

Just press your finger on the zone you want to play what another zone is playing until it indicates it is ready to merge. Then, drag it on top of the master zone and release. In roughly 30 seconds, the zones will combine.

To separate zones, repeat the process, but this time drag the zone you want to free below the dotted line.

Streaming from mobile device memory/NAS/Online Music Services

These screens let you access your available music, whether it be hard files on your network or connected to your a-live hardware, or what streaming options you've selected to be available.

By selecting "+ Add More Services," you can see the list of what services are available for you to add for your listening pleasure. This list will be updated over time as we continually work to bring new services to a-live.

Device Settings

Through device settings you can set an alarm clock or sleep timer, get technical information on your speaker, or rename it.

<u>a-live</u>

FAQ

Q: Do your devices support airplay and third-party DLNA apps?

A: Yes. They support airplay and third-party apps like BubbleUPNP...

Q: How many zones can you group on one system?

A: 12 rooms is the maximum, while 8 zones are recommended.

Q: What distance can your wireless audio system cover?

A: Once the system is connected to your WiFi router, you can stream your music anywhere there is a WiFi signal.

Q: Can it play high resolution music?

A: Yes. Our devices can play APE and FLAC within the normal bit rate range. They also support decoding 24bit/192khz music files.

Q: How many languages do you support?

A: Our devices will auto-detect your mobile device language and change automatically. Currently, we support English, French, German, Spanish, Chinese, Portuguese, Korean and Japanese and more on the way.

Q: What online music services do you support?

A: Spotify, Tidal, iHeartRadio, Tunein, Napster, and more, with more pending.

Q: Can I play local music?

A: Yes. You can play music from "MY MUSIC" on the application from local storage devices such as mobile device storage, USB thumb drives, portable hard disk and NAS.

Q: Can a-live work with Windows devices?

A: The Windows application is not available at the moment, but on the Windows PC, users can use iTunes, Foobar2000 and Spotify connect as a line input.
