Product Change Notification (PCN): PCN-MG-062018

Date: June 20, 2018

Dear Customer,

Amphenol Sine Systems is issuing Product Change Notification PCN-MG-062018 specific to our Motiongrade™ M23 Circular Connector Series. In an effort to streamline our product offering, Amphenol will discontinue our Standard Series (1 & 2) 90° Receptacle connectors and our suggested replacement for these parts will be our Elite Series (5 & 7) 90° Receptacle connectors. You may begin informing the customer of this PCN effective immediately. The Elite Series parts are direct functional replacements for the discontinued models. Amphenol asks that our customers begin to substitute the replacement products into inventory as soon as possible. The following pages will guide you through this process. Please review them carefully.

Your business is important to Amphenol and we remain fully committed to provide you the latest technology to meet your connector requirements. Amphenol understands the difficulties related to transitioning from one product line to another. Our Engineers, Product Manager and Customer Service representatives are here to assist with any questions or concerns regarding this transition.

Thank you for your time and cooperation in fulfilling this Product Change Notification.

Sincerely,

Kate Wilton, Product Manager - Motiongrade™ Series
Amphenol Sine Systems
44724 Morley Drive
Clinton Township, MI 48036 USA

Product Change Notification (PCN): PCN-MG-062018

Date: June 20, 2018

Reason: Product Replacement

Effective Implementation Date: June 20, 2018

Your assistance in completing the following is appreciated:

- Please review your inventory and place the affected packages with date codes that correspond to the products listed on Page 3 on hold for return.
- You may remove the specific affected packages with date codes that corresponds to the products listed on Page 3 from your warehouse immediately.
- If end-user, please contact your servicing distributor regarding appropriate actions for product associated with the date codes listed on Page 3.
- If you have finished product made with the changed part numbers, please work with your local servicing distributor to determine the appropriate next steps.

If you have any immediate questions, please contact your Customer Service Representative. Thank you very much for your attention to this matter.

Please reference the PCN Number in the subject line in all electronic correspondence.
