

12" SHEAR

PART NO: 700-500 DM9001 12" SHEAR

A powerful, cost effective, shear which has the ability to accurately cut PCB laminates, plastics up to 2.00mm thick and aluminum up to 1.5mm. An important feature of this shears is safety. Free access to the cutting area is prevented by heavy Perspex shielding extending along both sides of the blade. A safety latch is fitted to the pivot to prevent operation without it first being released. For positional accuracy the cutting bed is fitted with a rule which is recessed to assist in securing the PCB or sheeting whilst cutting is in progress.

The DM9001 will cut materials up to 305mm (12") and has a height of 670mm and a footprint of 440 x 245mm. It has a cutting bed of 225mm wide from the blade although wider material can be cut.
