

Full Size DJ Headphones

Description

Highly comfortable, full size headphones are perfect for all types of monitoring, DJ and general high fidelity music listening. Large 50mm diaphragms and open air design provide incredible fullness and wide frequency response. High efficiency design makes these fully suitable for use with everything from professional DJ equipment to iPod's. Features include a wide, self-adjusting headband, single side cable entry, large, soft padded earcups, attached 3.5mm connector with included 1/4" adapter.

Specifications

Diaphragm	: 50mm full range
Impedance	: 32Ω
Frequency Response	: 15Hz ~ 25kHz
Sensitivity	: 95dB
Cable length	: 3m (9.8')
Connector	: 3.5mm male (stereo)

Proper Fit

To maximize the performance and comfort, please take note of the LEFT/RIGHT markings on each ear cup. This will ensure proper fit and placement of the cups over the ear, as well as provide proper three-dimensional imaging of the audio source.

Precaution

As with any sound reproduction product, care should be taken to protect ones hearing. Continued exposure to excessive sound pressure levels can cause permanent damage to hearing. It is critical that good practices and general common sense be considered when listening to sounds through any audio system, particularly headphones.

Prior to using these headphones, the following should be practiced.

Prior to placing headphones on a your head

Make certain the power to the connected device is ON

Make sure the volume of the connected device is set to MINIMUM

Place the headphones on your head

If listening to a recording, press PLAY or similar button to start the music

Slowly increase the volume level until a comfortable level is reached

Do not turn power to the connected device ON or OFF while phones are on your head

If headphones are to be worn by small children, make sure the equipment is out of reach by them. Once material is playing, speak to the children, in a normal voice, while they are wearing them. They should be able to hear you above the program material, if not the material is too loud.
