Enabling Economical Bluetooth(tm) Connectivity

Looking for a low-cost, Bluetooth(tm) Version 2.0 adapter for your computing or other hardware devices?

The classic Dynamode **BT-USB-M2** is a feature-rich Bluetooth(tm) wireless device that supports the robust Bluetooth version 2.00 standard of up to 100 metres* (approx) Bluetooth range.

Compact in size and not much wider than the USB port itself, the BT-USB-M2 is ideal for Windows(tm)8.1 notebooks and PCs together with Mac(tm) OS X computers of 10.5.x or higher.

Plug n' play with USB2.0, utilising a low-power CSR(tm) or equivalent chipset with Bluetooth(tm) speeds of up to 3Mbps and, if environments allow, up to 100 metre range. Ideal for connectivity to Bluetooth(tm) peripherals such as keyboards, mice, speakers and other popular desktop accessories.

Ideal for Windows(tm)8.1 or higher, the BT-USB-M2 supports common Bluetooth(tm) operations and a very economical price point.
