

Hama Left-handed Mouse "Riano", black

Item: 00182645

GTIN: 4047443370853

- Browser buttons provide quick access to the forward/back functions in the Web browser for easy navigation
- Separate on/off switch allows for energy-saving use of the mouse
- Storable USB receiver can be transported inside the mouse to save space

ERGONOMICALLY SHAPED FOR THE LEFT-HANDED

When Hama designs a mouse for the left-handed, then it is well thought out. It's not just the buttons that are adjusted for left-handers – so, too, is the whole ergonomic shape. The mouse nestles pleasantly in your hand, and you can work comfortably and in a relaxed manner

INTUITIVE BUTTON

For the operation of the buttons with this left-handed mouse, do not worry. The buttons react in the opposite way to a right-handed mouse. All the pimples are your brain will not have to think in reverse - 'Riano' is for you.

PRACTICAL BUTTONS

Our 'Riano' mouse is not a simplified version of a right-handed mouse: It is equipped with everything that makes everyday work with a mouse easier.

Use the browser buttons to easily navigate back and forth within your Internet browser. Of course, a considerate approach to energy use is also required for mice: 'Riano' has a separate on/off switch to conserve battery power and extend battery life.

WIRELESS MOUSE WITH ADJUSTABLE SENSITIVITY

With our 'Riano' wireless mouse for left-handed users, there is no USB receiver in the way: It is so tiny that you can leave it plugged into the laptop. To safely transport the receiver and save space, you can place it inside the mouse. It takes about a minute for the receiver and transmitter to connect to one another.

Depending on the kind of work you do at the PC, you can set the mouse sensitivity (dpi) entirely according to your needs – up to a maximum of 1600 dpi for high sensitivity and fast mouse movements, or 800 or 1200 dpi for slower mouse movements and lower sensitivity.

As a left-handed user, you can lounge around on the sofa comfortably with 'Riano' – the eight-metre range of the 2.4-GHz mouse allows creative sitting positions.
