A195F
TILT & SWIVEL TV MOUNTING BRACKET
Vesa Size : 100 x 100mm
User Manual
Notice d'Utilisation

Thank you for purchasing an Electrovision bracket, please read these instructions carefully and leave with the user of the product for future reference.

IMPORTANT

Installer and Users please note:

These instructions should be read carefully and left with the user of the product for future reference.

BEFORE USE

Inspect the product for any signs of damage. If the product is damaged, DO NOT use it, and contact your supplier immediately

PRODUCT SAFETY

- Prior to the installation of this product, the installation instructions should be read and completely understood. The installation instructions must be read to prevent personal injury and property damage. Keep these installation instructions in an easily accessible location for future reference.
- **CAUTION:** The maximum load capacity is 15Kg. Use with products exceeding the maximum load capacity may cause serious injury. See appliance instructions.
- Do not install on a structure that is prone to vibration, movement or chance of impact. Failure to do so could result in damage to the display and/or damage to the stand.
- Do not place near heater, fireplace, air conditioning, in direct sunlight, or any other heat producing source. Failure to do so may result in damage to the display and could increase the risk of fire.
- It is recommended that two people perform the installation. Injury and/or damage can result from dropping or mishandling the display.
- The enclosed instructions are an aid to installation and cannot cover all eventualities, if you have any concerns regarding the mounting of the arm or brackets you should consult an expert.
- **CAUTION:** Before installation the mounting area should be checked that it is suitable for the weight of the bracket and screen and is free from pipes, electric cables or any other obstructions.

TV MOUNTING ACCESSORIES

No	Part	Qty	No	Part	Qty
A 	M4 x 12mm	4	E 	Plug 8 x 40mm	2
B 	M5 x 12mm	4	F1 	Washer	4
C 	M6 x 12mm	4	F2 	M6 Washer	2
D 	ST6 x 50mm	2			

TOOLS REQUIRED

STUD WALL FITTING INSTRUCTIONS

- Select a suitable position to mount the arm.
- It is recommended that the arm is mounted using the supplied bolts to the wooden supports behind the plasterboard. If you wish to mount directly to the plasterboard a survey of the plasterboard must be taken by suitably qualified installers and the correct mounting hardware must be purchased. The bolts and plugs provided are not suitable for this purpose.
- Use a stud detector to locate the centre points of a suitable wooden support.
- Mark the holes required.
- Drill pilot holes 3mm diameter by 50mm deep in the supports.
- Attach the arm to the wall using the 6x50mm bolts (D) and M6 washers (F2), the bolts should be tightened using a 12mm / 1/2 inch socket wrench or spanner.

BRICK/CONCRETE WALL FITTING INSTRUCTIONS

- Select a suitable position to mount the arm.
- Use a stud detector to check for hidden cables, pipes or steelwork.
- Place the arm against the wall and mark the holes required.
- Drill the holes with a 8mm diameter drill bit to a depth of 50mm.
- Insert the wall plugs (E).
- Attach the arm to the wall using the 6x50mm bolts (D) and M6 washers (F2), the bolts should be tightened using a 12mm / 1/2 inch socket wrench or spanner.

ATTACHING BRACKETS TO TV

The A195F TV bracket comes with a range of TV mounting accessories designed to fit the majority of televisions. Depending upon the required parts it may be necessary to use screws A, B or C with the washers (F1).

ATTACHING TV TO ARM

Due to the risk of damage or injury it is recommended that a minimum of two people should be used to attach the television to the arm. Before attaching the television to the arm, remove the screws (H) from either side of the bracket. The television should be tilted slightly forwards and the groove on the bottom of the bracket (J) should be placed over the wings (K) of the arm (see fig. 1). The TV bracket can now be locked to the arm (see fig. 4).

Re-insert the screws (H) into either side of the bracket, set to the required angle (between -5° and $+15^{\circ}$) and tighten the screws (see fig.2 and fig. 3).
