

Business Unit: Electric
Product range: Han / Han HP Direct
Author: Frank Boehmann
Title: Han HP Direct Cover - PI

PI/17/092/C+N

Date: 2017-12-19

Dear Ladies and Gentlemen,

We are glad to inform you about the new Han[®] HP Direct Covers for device side.

Description

The Han[®] HP Direct housing series dispenses with the classical bulkhead mounted housing and replaces it with two so-called mounting flanges. The Han[®] HP Direct hood consequently forms a seal directly on the switch cabinet wall.

With the new Han[®] HP Direct covers it is possible to protect the contacts and inserts at the device side against environmental and mechanical influences while the connector is unmated.

The new covers are available in the standard sizes of 6B, 10B, 16B and 24B.

They are made of a polycarbonate and fulfil the protection degree of IP66.

With the integrated fixing cord it is possible to realize a loss protection.
