Extech PQ1000

CAT IV Test Lead Kit

Features:

The Extech PQ1000 CAT IV Test Lead Kit is a 16-piece kit for use with digital multimeters or other test equipment. The lengthy, set of 4,10-foot test leads (black, red, blue, yellow) feature shrouded banana plugs on both ends, with one end positioned at a right angle. This convenient multipurpose kit also includes test probes, alligator clips, long-reach spring-loaded clips and an ergonomic over mold grip for comfort. With a high-voltage electrical measurement category rating of CAT IV-600V, these test leads are suitable for testing on primary supply sources.

- Electrical Measurement Category Rating: CAT IV-600V
- Compatible with PQ3400 series of power analyzers
