

Part Number: IL-SIG1

Description: LED Inspection Light

The IL-SIG1 is a high-quality signal light that is perfect across multiple industries. With a Red, Amber and Green light, you can use it to signal your intent and warn other as to the hazards around. These lights are emitted from high quality Samsung LEDs and can either be used with a solid or flashing light function, depending on where it is being used. These lights are operated from individual switches, meaning you can quickly access the lighting colour that you desire. In addition to these signalling lights, the IL-SIG1 also has a 600 Lumen SMD inspection light and a 200 Lumen torch in its head. This means it can also be used for any number of maintenance and inspection work, or just simply as a bright light to help you get from one place to another safely. Powering the IL-SIG1 is a rechargeable 4400 mAh Li-ion battery. This is easily charged via DC-USB, keeping costs low and allowing recharging to be performed from any available USB port. Thanks to the development of modern batteries, the unit has a strong 4 and a half hour runtime and can be recharged quickly in 6-7 hours. With Unilites heritage as an industrial torch manufacturer, its construction is understandably robust. Its housing has been made from ultra-strength polycarbonate, keeping it safe and secure when in operation and giving it a 1m impact resistance. Built into its construction is an ultra-strong magnetic hook, providing a versatile tool which allows for handsfree operation. If the unit is being used at a floor level, then the multi positional kickstand can be deployed, keeping it well positioned to deliver its strong spread of light. The IL-SIG1 is the next generation of signal light and provides an innovative and modern alternative over the older signal lights on the market.

## High performance LED

The inspection light is a multi purpose tool for all aspects of work & leisure. IP54 the lamp is fully weatherproof for all conditions meaning greater continual performance. The high capacity Lithium USB rechargeable batteries power the ultra bright Samsung LEDs to give unrivalled performance when carrying out tasks.

## Additional information

<b>Brand</b>	<i>Prosafe</i>
<b>LED</b>	<i>Samsung</i>
<b>Lumens</b>	<i>600</i>
<b>Battery</b>	<i>1 x 3.7v 4400 mAh Li-Ion</i>
<b>Beam Distance</b>	<i>52m</i>
<b>Run Time</b>	<i>4.5 – 24 hrs</i>
<b>IP Rating</b>	<i>IP54</i>
<b>Weight</b>	<i>334g</i>
<b>Height</b>	<i>205 mm</i>
<b>Width</b>	<i>60 mm</i>
