## **Power MOSFET**

# 40 V, 0.82 m $\Omega$ , 330 A, Single N-Channel

#### **Features**

- Small Footprint (5x6 mm) for Compact Design
- Low R<sub>DS(on)</sub> to Minimize Conduction Losses
- Low Q<sub>G</sub> and Capacitance to Minimize Driver Losses
- LFPAK8 Package, Industry Standard
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

#### **MAXIMUM RATINGS** (T<sub>J</sub> = 25°C unless otherwise noted)

| Parameter   |                  |                            | Symbol                            | Value          | Unit |
|---|------------------|----------------------------|-----------------------------------|----------------|------|
| Drain-to-Source Voltage   |                  |                            | $V_{DSS}$                         | 40             | V    |

| Pulsed Drain Current  | $T_A = 25^\circ$ | °C, t <sub>p</sub> = 10 μs | I <sub>DM</sub>                   | 900            | Α    |
| Operating Junction and Storage Temperature Range                          |                  |                            | T <sub>J</sub> , T <sub>stg</sub> | -55 to<br>+175 | °C   |
| Source Current (Body Diode)   |                  |                            | IS                                | 169            | Α    |
| Single Pulse Drain-to-Source Avalanche Energy (I <sub>L(pk)</sub> = 29 A) |                  |                            | E <sub>AS</sub>                   | 706            | mJ   |
| Lead Temperature for Soldering Purposes (1/8" from case for 10 s)         |                  |                            | TL                                | 260            | °C   |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

#### THERMAL RESISTANCE MAXIMUM RATINGS

| Parameter                                   | Symbol          | Value | Unit |
|---|-----------------|-------|------|
| Junction-to-Case - Steady State             | $R_{\theta JC}$ | 0.9   | °C/W |
| Junction-to-Ambient - Steady State (Note 2) | $R_{\theta JA}$ | 36    |      |

- The entire application environment impacts the thermal resistance values shown, they are not constants and are only valid for the particular conditions noted.
- Surface-mounted on FR4 board using a 650 mm<sup>2</sup>, 2 oz. Cu pad.
- 3. Maximum current for pulses as long as 1 second is higher but is dependent on pulse duration and duty cycle.

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

4. Pulse Test: pulse width  $\leq 300~\mu s$ , duty cycle  $\leq 2\%$ .

5. Switching characteristics are independent of operating junction temperatures.
