**Re:** NPC-100 and NPC-120 Partial

Amphenol Advanced Sensors offers NPC-100 and NPC-120 in two types of packaging, plate and Tape & Reel (T&R). This is to inform distributors that if their customer is looking for a quantity less than the quantity supplied in the plate, the distributor should provide the quantity from a T&R packaged product by cutting a partial of the T&R. **The distributor should not open or break plate products.**

Amphenol manufactures the NPC-100 and NPC-120 products in cleanrooms and they are extremely sensitive. Opening the product in an uncontrolled environment from its packaging can expose it to unwanted contamination.

Please reference table below in regards to which products can/cannot be cut for partial shipments.

Amphenol Part Number	Packaging	Can Be Cut for Partial
NPC-100	Plate	No
NPC-100T	T&R	Yes
NPC-120	Plate	No
NPC-120T	T&R	Yes

Moving forward, NPC-100 and NPC-120 (Packaging: Plate for both items) will only be available via a special order by consulting the factory.

Amphenol requests distributors to return any partial plates they have in inventory. Please contact your Amphenol Customer Care representative to issue an RMA.

Thank you.

Sincerely,

Dhatri Bhatt
