EXPERT GE-EC 720 T Kit Pole-mounted powered pruner

Art.-No. 45.016.80

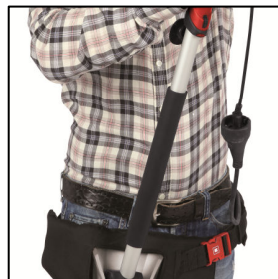

This pole-mounted powered pruner is excellent suitable for cutting or felling out of the ground of branches that lie higher. The length adjustable carrying belt warrants an equal weight distribution. The additional handle and the covering of the handle warrant a safety use. The 15° tilted saw head optimized the power transmission from the cutting unit to the cutting commodity. The length of the saw with the cutting mountings is because of the continuous extendable alu-telescopic handle variably adjustable from approx. 2.30 m – 2.90 m. So you can reach a working height up to approx. 4 m. When using the telescope tube extension you can reach a work height from approx. 4.50 m. The chain is easy to tension and change without using any tools.
