All of our products undergo strict quality checks to ensure that they reach you in perfect condition. In the unlikely event that your device develops a fault, please contact our service department at the address shown on this guarantee card. You can also contact us by telephone using the customer service number shown. Please note the following terms under which guarantee claims can be made:

1. These warranty terms regulate additional warranty services, which the manufacturer mentioned below promises to buyers of its new products in addition to their statutory guarantee claims are not affected by this guarantee. Our guarantee is free of charge to you.

2. The warranty services only covers defects due to material or manufacturing faults on a product which you have bought from the manufacturer mentioned below are limited to either the rectification of said defects on the product or the replacement of the product, whichever we prefer.

Please note that our devices are not designed for use in commercial, trade or professional applications. A guarantee contract will not be created if the device has been used by commercial, trade or industrial business or has been exposed to similar stresses during the guarantee period.

3. The following are not covered by our guarantee:
   - Damage to the device or parts of the device caused by normal or natural wear or tear or by normal use of the device.
   - Damage to the device caused by a failure to follow the assembly instructions or due to incorrect installation, a failure to follow the operating instructions (for example connecting it to an incorrect mains voltage or current type) or a failure to follow the maintenance and safety instructions or by exposing the device to abnormal environmental conditions or by lack of care and maintenance.
   - Damage to the device caused by abuse or incorrect use (for example overloading the device or the use or unapproved tools or accessories), ingress of foreign bodies into the device (such as sand, stones or dust, transport damage), the use of force or damage caused by external forces (for example by dropping it).

4. Your Product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. Lithium Ion batteries and chargers are covered by a 12 month warranty. Warranty excludes consumable parts. Guarantee claims should be submitted before the end of the guarantee period within two weeks of the defect being noticed. No guarantee claims will be accepted after the end of the guarantee period. The original guarantee period remains applicable to the device even if repairs are carried out or parts are replaced. In such cases, the work performed or parts fitted will not result in an extension of the guarantee period, and no new guarantee will become active for the work performed or parts fitted. This also applies if an on-site service is used.

IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO THE PLACE OF PURCHASE WITH YOUR REGISTER RECEIPT.

Please refer to the restrictions of this warranty concerning wearing parts, consumables and missing parts as set out in the service information in these operating instructions.

**Setup & Preparation**

### 1. Assembly and Starting

**Pre Setup Checks**
- Examine the machine for signs of transit damage. If damaged, do not use, return to place of purchase.
- The compressor should be set up near to the user.
- Avoid long air lines and long supply lines (extensions).
- Make sure the intake air is dry and dust-free.
- Do not set up the compressor in damp or wet rooms.
- The compressor is designed to be used in dry rooms. It is prohibited to use the compressor in areas where work is conducted with sprayed water. Before you use the machine, make sure that the mains voltage complies with the specifications on the rating plate.

---

**Online Manual**
Scan this QR Code with your mobile device to take you to the online manual.
2. OPERATION

Connecting to the Compressed Air Hose

1. Insert the nipple of the air tool into the quick-lock coupling of the air hose.

2. The quick-lock sleeve will spring forward automatically, connecting the accessory.

Disconnecting

1. To disconnect the air tool, pull back the sleeve on the quick-lock coupling and remove the tool.

IMPORTANT!: BEFORE CONNECTING OR DISCONNECTING ACCESSORIES, ALWAYS MAKE SURE THAT THE COMPRESSOR IS OFF.

IMPORTANT!: WHEN RELEASING THE QUICK-RELEASE COUPLING, BE SURE TO HOLD THE COUPLING PIECE TO PROTECT YOURSELF AGAINST INJURY FROM THE REBOUNDING HOSE.

Switching On and Off

Note: It is recommended to use in conjunction with this appliance a Residual Current Device (RCD) of rating not exceeding 30mA.

1. Attach the desired tool to the quick release coupling of the air hose.

2. Connect the compressors’ power cord to the mains power supply.

3. To switch ON the equipment, set the On/Off switch to position “1” (On).

4. To switch OFF the equipment, move the On/Off switch to position “0” (Off). Disconnect the power cord from the mains.

5. Run the attached air tool until no compressed air remains in the hose.

WARNING!: COMPRESSED AIR CAN BE A DANGEROUS FORM OF ENERGY. GREAT CARE IS REQUIRED WHEN USING THE COMPRESSOR AND ITS ACCESSORIES.
3. INFLATING

Inflating Tyres

1. Attach the air gun to the compressed air hose.

2. When inflating tyres with normal “Schrader” valves, no adaptors need to be fitted to the rubber hose.

3. Connect the rubber hose of the air gun to the tyre by pressing the end of the hose onto the tyre valve while holding down the hose tab.

4. Release the valve connector. The hose will now be connected to the tyre valve.

5. To inflate the tyre, hold down the trigger of the air gun.

6. After a short time, release the trigger and check the tyre pressure by referring to the pressure gauge.

IMPORTANT! AVOID INFLATING THE OBJECTS ABOVE THE RECOMMENDED INFLATION PRESSURE. THIS MAY LEAD TO DAMAGE AND/OR INJURIES.

7. If the tyre pressure is too high, it can be reduced with the integrated release valve.
Using the Equipment as a Blower Pistol

1. To use the air gun as a blower pistol you must first unscrew and remove the rubber hose.

2. The blower nozzle can then be screwed into the inflation gun.

3. By varying the pressure on the trigger, you can control the amount of compressed air released through the air nozzle.

4. The blower nozzle adapter is useful for blowing dust out of hollow spaces or hard to reach areas, such as vents in electrical items or between the keys of a keyboard. It is also useful for cleaning soiled equipment.

Inflating other items

The compressor kit is supplied with a variety of adapters that can be fitted to the rubber hose. These adapters are suitable for different valves that are often used on inflatable items:

Adapter A is used for footballs, basketballs, soccer balls etc.

Adapter B is used for rubber dinghies, inflatable small swimming pools and air beds.

Adapter C is used for bicycle tyres with “French” or “Presta” valves.

Attaching Inflation Adapters to the Rubber Hose

1. Push the suitable adaptor into the rubber hose while pressing the hose tab.

2. Once it is inserted, release the hose tab.

3. Turn the adaptor in a clockwise direction to secure it in place.

WARNING! OPERATOR IS ADVISED TO WEAR EYE PROTECTION WHEN USING THE AIR GUN. TAKE CARE NOT TO BLOW DIRT OR OTHER LOOSE PARTICLES TOWARDS YOURSELF OR OTHER PERSONS.

WARNING! DO NOT DIRECT THE JET OF COMPRESSED AIR TOWARDS PEOPLE OR ANIMALS.

Adapter A

Adapter B

Adapter C
**5. TROUBLE SHOOTING**

**6. CLEANING & MAINTENANCE**

** IMPORTANT! BEFORE CLEANING YOUR COMPRESSOR OR CARRYING OUT ANY MAINTENANCE PROCEDURE, MAKE SURE THAT THE MOTOR IS OFF AND THE TOOL DISCONNECTED FROM THE POWER SUPPLY TO PREVENT ACCIDENTAL STARTING.**

** IMPORTANT! WAIT UNTIL THE COMPRESSOR HAS COMPLETELY COOLED DOWN. RISK OF BURNS!**

** IMPORTANT! ALWAYS DEPRESSURIZE THE EQUIPMENT BEFORE CARRYING OUT ANY CLEANING AND MAINTENANCE WORK.**

**Cleaning**

- Keep the safety devices free of dirt and dust as far as possible. Wipe the equipment with a clean cloth or blow it with compressed air at low pressure.

- We recommend that you clean the appliance immediately after you use it.

- Clean the appliance regularly with a damp cloth and some soft soap. Do not use cleaning agents or solvents; these may be aggressive to the plastic parts in the appliance. Ensure that no water can get into the interior of the appliance.

- You must disconnect the hose and any spraying tools from the compressor before cleaning. Do not clean the compressor with water, solvents or the like.
7. STORAGE

IMPORTANT! STORE THE COMPRESSOR ONLY IN A DRY LOCATION WHICH IS NOT ACCESSIBLE TO UNAUTHORISED PERSONS. ALWAYS STORE UPRIGHT, NEVER TILTED!

SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse or Homebase store. For further information, or any parts visit www.ozito-diy.co.uk or contact Ozito Customer Service:

- Great Britain: 0151 294 4488
- Ireland: 1850 882711
- E-mail: enquires@ozito-diy.co.uk
**ELECTRICAL SAFETY**

**WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be adhered to to reduce the risk of fire, electric shock, personal injury or damage.

Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save all instructions and other documents supplied with this tool for future reference.

Before you connect the equipment to the mains supply make sure that the data on the rating plate are identical to the mains data.

This tool is double insulated therefore no earth wire is required.

**GENERAL POWER TOOL SAFETY WARNINGS-PERSONAL SAFETY**

**WARNING!** Read all safety warnings and all instructions. Failure to follow the instructions may result in serious injury or death.

Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
   - Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   - Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   - Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety
   - Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
   - Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   - Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
   - Do not tamper with the switch. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
   - When operating power tools, use an extension cord suitable for outdoor use.
   - Use of a cord suitable for outdoor use reduces the risk of electric shock.

3. Personal safety
   - Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol, or medication.
   - A moment of inattention while operating power tools may result in serious personal injury.
   - Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injury.
   - Prevent unintentional starting. Ensure the switch is off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energizing power tools that have the switch on invites accidents.

4. Power tool use and care
   - Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
   - Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
   - Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or performing maintenance. The power tool is operating when it is plugged in. Such preventive safety measures reduce the risk of starting the power tool accidentally.
   - Store idle power tools out of the reach of children and do not allow persons unfamiliar with them or the safety rules to operate the power tool. Power tools are dangerous in the hands of untrained users.
   - Maintain power tools. Check for misalignment or binding of any parts. Check for damaged parts (such as a loss of joint tightness). A moment of inattention while operating power tools may result in serious personal injury.
   - Have the power tool repaired by a qualified repair person if the switches are not in proper working condition. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
   - Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

5. Service
   - A. Never repair power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.
   - if the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

**AIR COMPRESSOR SAFETY WARNINGS**

This appliance is not intended for use by young or infirm persons unless supervised by a responsible person to ensure that they can use the appliance safely. Young children should be supervised to ensure that they do not play with the appliance.

**WARNING.** Before connecting a tool to a power source ( mains switch power point receptacle, outlet, etc.) be sure that the voltage supply is the same as that specified on the nameplate of the tool. A power source with a voltage greater than that specified for the tool can result in serious injury to the user, as well as damage to the tool. If in doubt, do not plug in the tool. Using an appliance with a voltage less than the nameplate rating is harmful to the motor.

Always remove the plug from the mains socket before making any adjustments or maintenance.

- a. Ensure that the compressor is on a stable surface.
- b. Make sure the compressor is securely connected to the electrical network. Do not use extension cords with this product. Use additional air hose instead of an extension cord. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- c. Be certain to read all the labels on the containers of paint or other materials to be sprayed. Closely follow all safety instructions. Use a respirator mask if there is a chance that you might inhale the spray material. Carefully check the effectiveness of any respirator mask you intend using.
- d. Always wear safety goggles or glasses when using the air compressor. Never point the nozzle of an accessory towards any part of your body or towards another person.
- e. Keep the compressor at least 300mm from the nearest wall to ensure adequate ventilation for cooling purposes.
- f. Always wear safety goggles or glasses when using the air compressor. Never point the nozzle of an accessory towards any part of your body or towards another person.
- g. Keep the compressor 300mm from the nearest wall to ensure adequate ventilation for cooling purposes.

**WARNING!** In the event that an air line is cut or broken, the air supply must be turned off at the compressor. A broken air line which is not supported is extremely dangerous and can whip around very quickly, both with the capability of striking people, and blowing foreign particles into the compressor. Do not attempt to catch the air line but immediately kickstanders well clear and turn off the air supply to the hose, turn off the compressor at the On / Off button, and then remove the hose from the compressor.

**WARNING!** Never point the blow-out gun at other persons and never use it to clean clothes that are still being worn.
Service information

We have competent service partners in all countries named on the guarantee certificate whose contact details can also be found on the guarantee certificate. These partners will help you with all service requests such as repairs, spare and wearing part orders or the purchase of consumables.

Please note that the following parts of this product are subject to normal or natural wear and that the following parts are therefore also required for use as consumables.

* Not necessarily included in the scope of delivery!

In the effect of defects or faults, please register the problem on the internet at www.isc-gmbh.info. Please ensure that you provide a precise description of the problem and answer the following questions in all cases:

- Did the equipment work at all or was it defective from the beginning?
- Did you notice anything (symptom or defect) prior to the failure?
- What malfunction does the equipment have in your opinion (main symptom)? Describe this malfunction.

Declaration of conformity

ISC GmbH · Eschenstraße 6 · D-94405 Landau/Isar

explains the following conformity according to EU directives and norms for the following product:

Inflate-It Compressor ACK-190U (Ozito)

Art.-No.: 40.205.56 | L-No.: 11016

Subject to change without notice

Declaration of conformity
Technical data
- Main connection: 220-240 V ~ 50 Hz
- Motor rating: 1100W S3 15%
- Idle speed n\(\text{idle} \) (pump): 3,450 min
- Idle speed n\(\text{idle} \) (motor): 15,000 min
- Max. working pressure: 8 bar (116 psi)
- Theoretical air intake: 190 l/min
- Output (compressed air) at 7 bar: 55 liters/min
- Output (compressed air) at 4 bar: 63 liters/min
- Sound power level L\(\text{WA} \) dB: 97
- K\(\text{WA} \) uncertainty: 1.5 dB
- Sound pressure level L\(\text{PA} \) dB: 83
- K\(\text{PA} \) uncertainty: 1.5 dB
- Protection class: IP20
- Weight of the unit in kg: approx. 6.5 kg
- Protection class: II

Noise
- Noise emission values were measured in accordance with EN ISO 3744.
- Operating mode S3: 15% - 10 min:
- Intermittent mode without influencing the starting process. This means that during a period of 10 min the max. operating time is 15% (1.5 min).
- The specified vibration value was established in accordance with a standardized testing method. It may change according to how the electric equipment is used and may exceed the specified value in exceptional circumstances.
- The specified vibration value can be used to compare the equipment with other electric power tools.
- The specified vibration value can be used for initial assessment of a harmful effect.

Keep the noise emissions and vibrations to a minimum.
- Only use appliances which are in perfect working order.
- Service and clean the appliance regularly.
- Adapt your working style to suit the appliance.
- Do not overload the appliance.
- Have the appliance serviced whenever necessary.
- Switch the appliance off when it is not in use.
- Wear protective gloves.

Caution!

Residual risks
- Even if you use this electric power tool in accordance with instructions, certain residual risks cannot be ruled out. The following hazards may arise in connection with the equipment’s construction and layout:
  1. Lung damage if no suitable protective dust mask is used.
  2. Damage to hearing if no suitable ear protection is used.
  3. Health damage caused by hand-arm vibrations if the equipment is used over a prolonged period or is not properly guided and maintained.

Proper use
- The initial air compressor is designed for generating compressed air for tools operated by compressed air.
- The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user/operator and not the manufacturer will be liable for any damages or injuries of any kind caused as a result of this.

Please note that our equipment has not been designed for use in commercial, trade or industrial applications. Our warranty will be voided if the machine is used in commercial, trade or industrial businesses or for equivalent purposes.

Recycling alternative to the return request:
- To comply with European Directive 2012/19/EC concerning old electric and electronic equipment and its implementation in national laws, old electric power tools have to be separated from other waste and disposed of in an environment-friendly fashion, e.g. by taking to a recycling depot.

For EU countries only

Never place any electric power tools in your household refuse.

To comply with European Directive 2012/19/EC concerning old electric and electronic equipment and its implementation in national laws, old electric power tools have to be separated from other waste and disposed of in an environment-friendly fashion, e.g. by taking to a recycling depot.

Recycling alternative to the return request:
- As an alternative to returning the equipment to the manufacturer, the owner of the electrical equipment must make sure that the equipment is properly disposed of if he no longer wants to keep the equipment. The old equipment can be returned to a suitable collection point that will dispose of the equipment in accordance with the national recycling and waste disposal regulations. This does not apply to any accessories or aids without electrical components supplied with the old equipment.
