

Measure signal level & quality for pinpoint alignment

This handy meter gives sound and visual displays to help you lock onto the peak signal, it includes data on 100 satellites and calculates best dish alignment for you.

S201

Satellite meter

- Compatible DVB-S/S2 DISEqC 1.0/1
- Sound and light aids final adjustment
- Stores data for 100 satellites
- Rechargeable Li-Ion battery and charger
- Protective sleeve and neck strap
- Magnetic compass and torch light

S201 - Satellite Input/Demodulation

Input frequency	950-2150MHz
Signal input level	-65dB to -25dBm
LNB supply/control	13V/18V Max 300mA/22kHz
Demodulation type	QPSK, 8PSK
