Re: Discontinuation Notice – AG4 Safety Laser Scanner Series

With Banner Engineering's February 2019 launch of our newest SX5 Safety Laser Scanner platform, Banner is issuing notification that we will be phasing out and discontinuing the AG4 Safety Laser Scanner Series. This discontinuation notice includes the AG4-4E and AG4-6E laser scanners, kits, machine interface and PC cordsets, and all other miscellaneous parts associated with this scanner platform.

Banner will accept Last Time Buy (LTB) orders for these affected AG4 based model numbers through October 31, 2019 with a Last Time Ship (LTS) date of December 31, 2019.

Banner's Advanced Technical Support group will be providing guidance and documentation to situationally integrate or replace new SX5 laser scanners within existing AG4 laser scanner installations if desired.

Please notify your customers who use these AG4 products with this information and work with your Regional sales and technical application contacts for all your safety laser scanner needs and opportunities.

Thank You!
