

The iconic Wera Advent calendar celebrates its 10th birthday

Code Nr.: 05 136600 001
EAN: 4013288206558

The 2019 Wera Advent calendar combines new products for true screwdriving fun with proven problem solving tools with professional quality. The new T-handle fits comfortably in the hand. Its two-component nature ensures a secure and firm grip. The T-handle geometry enables a particularly high level of leverage. The integrated Rapidaptor quick-release chuck offers full flexibility

in screwdriving applications and a lightning-fast, secure change of the required tool.

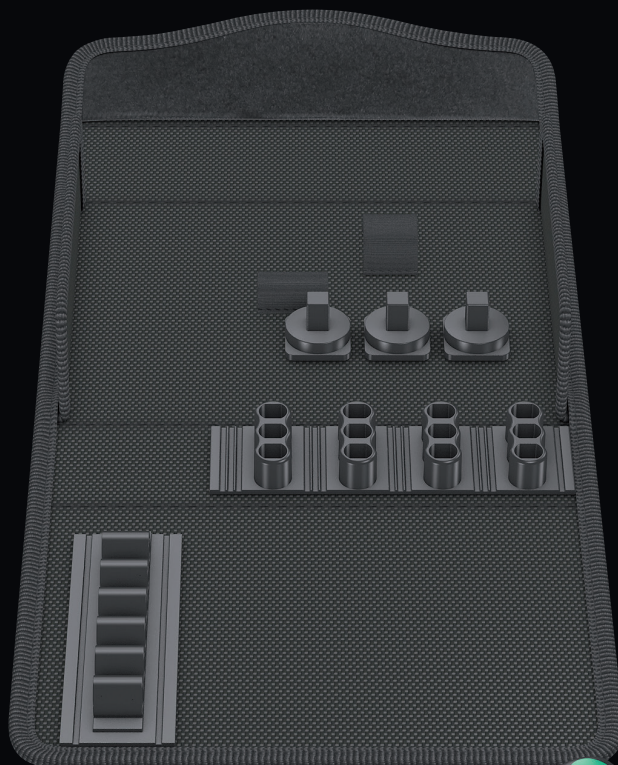

Also new: the small Stubby bit holder, which comes in handy in compact installation spaces. The integrated magnetic holder is also extremely small and allows the user the full choice of screwdriving bits.

CONTENT

1 x Textile box

Incredibly, the Wera Advent calendar celebrates its 10th birthday in 2019! On this occasion, this year's calendar includes two special extras: A Stubby bottle opener and a T-handle corkscrew. A duo that is not only high quality, but also a real eye-catcher.

All screwdriving tools can be stored and protected in the included textile box. This box has a non-woven zone on the outside and thanks to the hook and loop fastener strip (also included) is easily mounted on a wall or a workshop trolley. This allows compatibility with the tool transport system Wera 2go.

1 x Corkscrew
