

# Video Converter

## User Manual

### AV/BNC to VGA

**Part Number: 82-10773**

## Introduction

This video converter can convert the source signals of CVBS, VIDEO and S-VIDEO into VGA signal. With adoption of advanced video straight-through technology, the source signals of BNC, AV and S-VIDEO can be converted into progressive scanning vga signal without any data loss. What is more, the parameters of the program source such as brightness and contrast are adjustable. It supports plug-and-play, no driver program installation is needed.

## Performance Features

1. Supported conversion of video signal formats: from CVBS or S-VIDEO signal into frequency multiplication processed high-resolution VGA signal.
2. Multiple input signal formats are supported: CVBS, S-VIDEO and VGA. Also automatic identification of the two colour systems i.e. PAL and NTSC is supported.
3. Support output resolution(4:3 screen):  
800×600 @ 60/75Hz; 1024×768 @ 60Hz; 1280×1024 @ 60Hz; 1600×1200 @ 60Hz
4. Support output resolution(16:9/16:10 screen):  
1280×720 @ 60Hz; 1366 × 768 @ 60Hz; 1440 × 900 @ 60Hz; 1600 × 900 @ 60Hz;  
1680×1050 @ 60Hz; 1920 × 1080 @ 60Hz; 1920 × 1200 @ 60Hz
5. Adjustable brightness, contrast, colour saturation and hue.
6. Current working status can be saved on accidental power-off.
7. OSD caption prompts function for all operation and status.
8. Dimensions: 105mm (max. length) × 65mm (max. width) × 27mm (max. Height).

Note: The manufacturer provides OEM & ODM service and is capable of making special modification on the product as per client's requirements.

## Product Parts List (standard configuration)

Parts Name	Quantity	Notes
Host machine	1	
Power supply cable		SV/1A
User manual		

## Sketch Map

---

## Ports Description (refer to the sketch in Section IV)

VGA OUT	to PC monitor
VGA IN	to PC graphic card
S-VIDEO IN	to DVD/VCD etc.
CVB-S IN	to monitor camera or video matrix
Power 5-12V	Support 5-12V wide voltage input

## Installation and Settings

1. Get the product well connected according to "Connection Sketch of Video Converter" on Page 4.
2. Select the source signal and adjust the picture colour quality. A brief description of the keys are as the following:

**Input** Video input selection: switch between CVBS >>S\_ VIDEO(C/Y) >> VGA  
**Menu** Menu key: switch for adjustments between menu items Resolution, Contrast, Colour saturation and Hue.  
When BRIGHT is displayed, press + to increase the brightness of image and Resolution / - to decrease.  
When CONTRAST prompt is displayed, press + to increase the contrast degree of image and press Resolution /- to decrease.  
When Saturation is displayed, press + to increase the colour saturation of image, and press Resolution / - to decrease.  
When Hue is displayed, press + to increase image hue and press Resolution / - to decrease.

**Resolution / -** When menu is closed, press this key to select resolution:  
800×600 @ 60/75Hz; 1024×768 @ 60Hz; 1280×1024 @ 60Hz; 1600×1200 @ 60Hz

**Wide Screen** : Press this key to select resolution for Wide Screen:  
1280×720 @ 60Hz; 1366×768 @ 60Hz; 1440×900 @ 60Hz; 1600×900 @ 60Hz; 1680×1050 @ 60Hz;  
1920 × 1080 @ 60Hz; 1920×1200 @ 60Hz

Press **Input** and **Resolution / -** at the same time to restore the default settings.

### Default settings:

Signal input channel: CVBS  
Output Resolution: 1024×768 @ 60Hz  
Brightness: 50  
Contrast: 50  
Colour saturation: 50  
Hue: 0

3. Notes for installation and configuration:

Power: please use 5-12V DC power supply, otherwise the product may not work normally or may get burnt.

Input video signal:

Supports S\_ video and CVBS, self-adaptive to PAL/NTSC

Signal peak value: 1 Vpp

Resistance: 75Ω

Output VGA signal (when S-VIDEO or CVBS is selected):

R,G ,B signal peak value : 0.7Vpp resistance: 75Ω

Field synchronizing signal peak value : 3Vpp resistance: 75Ω

Line synchronizing signal peak value : 3Vpp resistance: 75Ω

Button

Button type: single.

Single button operation: press down the button and for at least 75 milliseconds, then release.

Combined operation: press down and hold the first button, and then press down the second button, keep both buttons pressed down for at least 75ms, then release.

## Trouble shooting

### 1. No VGA output displayed

Check to see if the power is connected, if the indicators are lighted. Also check if the output equipment is normal condition, and if blue screen or no screen is displayed, check to see if the video input port is correct.

### 2. No image displayed on monitor

Press Input to select video output.

## Certificate of Quality

NO DROP

NO DAMP

NO PRESSURE

NO HIGH TEMPERATURE
