New suppliers for EPCOS coil formers made of Sumikon material

In order to improve delivery performance and minimize the occurrence of burrs, two new suppliers will produce the following EPCOS coil formers made of Sumikon material, replacing the current supplier. For some coil formers, the existing tools will be transferred to the new suppliers (see asterisk in table). New tools will be installed for the others. The ordering codes will remain the same, but labels on the packaging will indicate the change, for example, with the suffix V01, V02 or V04.

Ordering code (15 digits)	Labels on the packaging (18 digits)	Description
B65804N1105D001	B65804N1105D001V01	RM 4 Sumikon PM 9630

4. Description of change Change of supplier for listed coil formers made of Sumikon material. Assembly of new tools at new suppliers or transfer of existing tools for certain items.			
5. Effect on the product or for the customer (benefit, quality, specification, lead time) Improved delivery performance and minimizing the occurrence of burrs in the case of new tools. TDK does not expect detrimental effects on the specified characteristics. The ordering codes remain the same, but labels on the packaging unit will indicate the change, e.g. suffix V01 or V02.			
6. Quality assurance measures / risk assessment Dimensional measurements, solderability, PIN insertion, PIN pull out, flange strength and appearance tests performed successfully.			
7. Scheduled date of change October 14, 2019, after customer approval			

8. Estimated date of first delivery of changed product October 14, 2019, after customer approval
If TDK Electronics AG does not receive notification to the contrary within a period of 10 weeks,
TDK Electronics AG assumes that the customer agrees to the change.

For an interim period we cannot rule out that old as well as new products will be shipped.

Future shipments can consist of old and new products as the new changed product is used as an alternative to the old product.
