

DVR-4HD

Drive Recorder with
Speed Camera Detection

Snooper DVR-4HD

The Reliable Witness

The 3rd generation of DVR-4HD adds Wi-Fi connectivity and a dedicated App. Featuring a 1080p, full HD camera shooting at 30fps, Snooper DVR-4HD also has a 3.0" LCD display with a 152° viewing angle plus built-in speed camera alerts to keep your license safe. An optional 1080p HD rear camera is available to provide additional protection.

KEY FEATURES

Built-in Wi-Fi connectivity – Downloading and using the free Drive HD App allows you to configure your device as well as playback and download footage on your smartphone.

3.0" LCD Screen - Enjoy clear and instant playback after an incident to identify who was at fault.

Speed Camera Alert System - Keep within the speed limit and protect yourself against any speeding tickets.

1080p Full High Definition Recording - For crystal clear recording, DVR-4HD delivers full HD footage when you need it most.

Lane Departure Warning System – When enabled, the LDWS provides an audible alert and screen message when you deviate from or change lanes at speeds over 70 kph (43 mph), helping keep you and your passengers safe.

Motion Detection - Keep your vehicle safe, even when you're parked up with DVR-4HD Motion Detection. Recording automatically starts once motion is detected. DVR-4HD must be hard-wired to a permanent 'live' for constant motion detection.

PRODUCT FEATURES

GPS Location Data - With built-in GPS, DVR-4HD provides the incident's location plus time, date and speed you were travelling.
3 Axis G-Sensor - The built-in G-Sensor will monitor impact from 3 separate directions, ensuring that it will never miss an incident.
Downloadable Speed Camera Alerts – Receive alerts to fixed camera locations and known high risk zones via GPS to help keep you within the speed limit and protect against speeding tickets.
32GB MicroSD Card Included - To capture any driving incidents, DVR-4HD comes complete with a 32GB micro SD card giving up to 4 hours recording before overwriting the oldest footage.
Forward Collision Warning – Provides voice and screen alerts when you drive too close to the vehicle in front, helping keep you and your passengers safe.
Driver Fatigue Alerts - DVR-4HD includes driver fatigue alerts, which notify drivers to take a break on long distance driving.
Front Car Movement Detection (FCMD) - DVR-4HD detects movement of the car in front of you, emitting audible and screen alerts.
Continuous Loop Recording - Automatically overwrite the old data that hasn't been filed into the incident folder. Continuous loop recording means you will never miss an incident due to a full SD card.
Records Both Motion and Still Shots - Get a complete picture of the incident with video footage plus the ability to take still shots of the damage to your vehicle.
Built-in Microphone - Record any conversations within the vehicle before during and after the incident.
