## AURORA INDUSTRIAL BLUETOOTH® HEADSETS

# The Smart Way to Communicate on the Job

## Bluetooth® 4.0 Technology Provides Application Versatility

Bluetooth® 4.0, or Bluetooth® Smart technology provides Aurora Class headsets with out-of-the-box connectivity to smart phones, computers and a wide variety of audio/listening devices, including leak detectors, machine health analyzers and other ruggedized equipment.

### Low Power Usage Means Less Charging, Longer Service Life

Bluetooth® 4.0 is optimized for energy efficient, low power usage, allowing Aurora Class headsets to provide **up to 80 hours** of continuous use before recharging. USB charger cord and wall adapter are included with each headset.

## Aurora Class, Smart Compatible, Bluetooth® Headsets

David Clark HBT Series headsets combine wireless freedom, work-ready reliability and smart device compatibility via Bluetooth 4.0 technology. They are the ideal solution for communicating clearly in high noise environments – from the manufacturing floor to construction sites, Pro Audio to Pro Gaming – virtually anywhere that smart devices are used.

### Rugged Design. Outstanding Comfort.

Aurora Class HBT Series headsets are built to last with industrial-grade components that stand up to harsh environments. Designed with advanced comfort features for all day use. Built on the same proven platform as industry-leading David Clark headsets for aviation, fire/rescue, marine, military and other industries that require flawless performance for critical communications.

### Enhanced Safety and Productivity.

Worker safety and productivity go hand-in-hand in the workplace. HBT Series headsets promote safety through clear communication and keep workers more productive. The added benefit of hearing protection in noisy environments helps to prevent hearing loss, increases alertness and reduces worker fatigue.

### Keep Working. Keep Communicating.

When running machinery or heavy equipment it may be impossible for workers to stop what they're doing to communicate with other co-workers or crew members. HBT Series headsets allow workers to communicate clearly and hands-free while continuing to work.

## Aurora Class Headset Features

Volume control switch on headset dome (**Model HBT-60 headset only**) for easy volume adjustment of paired device to preferred listening level, even while wearing work gloves. Press top of switch to increase volume. Press bottom of switch to decrease volume. Please note, for **Models HBT-30 and HBT-40**, volume is controlled solely by the paired device.

### Bluetooth® 4.0 Provides:

- **Pairing Memory**  
Remembers last device it was paired to when turned on.
- **Self Healing Connection**  
Automatically repairs the connection should user walk out of range.
- **Legacy Compatibility**  
Backwards compatible to older Bluetooth devices.
