# Cyntech Raspberry Pi Split

Plug more on to your Raspberry Pi with this handy little board. Suitable for plugging in to a breadboard to make prototyping so much easier.

With the pins broken out individually on standard 2.54mm headers, the use of Dupont wires is ideal in combination with the labelled pins, saving the hassle of counting pins with the risk of plugging in to the wrong place.

The Raspberry Split has the BCM GPIO labelling along with power and GND pins shown

General Specifications

PCB Size	65x23x1.6mm (W x D x H)
Net weight	36g

Operation Specifications

		Min	Typ	Max
Operating Temperature:		0c		70c
Storage Temperature:		0c		70c
Relative humidity:		5%		95%
