### 

SOLDERING STATION FU-601

- Accurate solder feeding
- Supports solder diameters of 0.3 mm and up to 1.6 mm
- Solder feed error detection
- Equipped with countermeasures against solder ball splash as standard

### SOLDERING STATION FU-600/601 SAR

- Easy tip replacement
- High performance composite tip
- Six presets tip-temperature function
- 300 W of ultra-high power (FU-601)

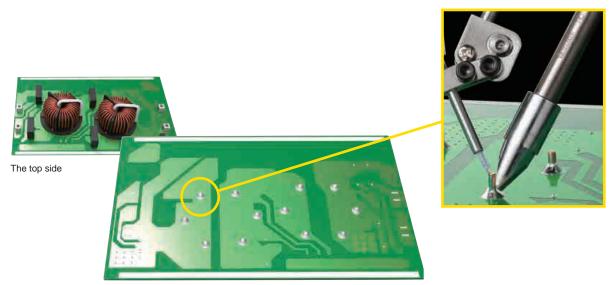

### **Replacement Parts (Optional)**

\* The accessories are required for initial set-up, such as a solder feed pulley unit, solder-feed guide set, and teflon tube are not included. They must be ordered separately and adapted to use with the soldering iron and solder wire diameter.

### Features

### 300 W of ultra-high power FU-601 is added to Auto-Soldering System.

The reverse side

### Compact TX1 series can provide excellent thermal recovery characteristic despite its compact design.

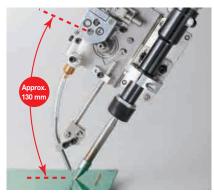

### Countermeasures against solder ball splash

Equipped with a mechanism that perforates into the solder wire as standard.

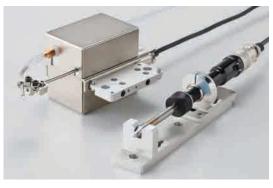

### Accurate solder feeding

The solder feed unit is closer to the iron.

### Easy tip replacement

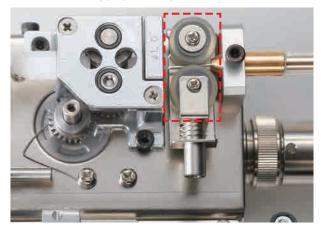

The position of the tip end can be easily adjusted using the tip adjustment jig unit included with FU-600 and FU-601.

### **More Features**

### Solder feed error detection

With an optical sensor for solder movement, FU-500 can detect solder clogging, slipping and the end of the roll.

### **Optional Parts & Accessories**

### Slide unit

This unit allows the soldering unit vertical movement with external air.

Slide unit (for drag soldering) This unit absorbs height variation.

**Temperature probe** The probe makes tip temperature measurement easy.

 $N_2$  adapter assembly Simply attach the optional  $N_2$  adapter to the iron and install a nozzle assembly that matches the tip to perform  $N_2$ soldering.

**Two types of soldering irons** Straight iron FU-6001

L-shaped iron FU-6002

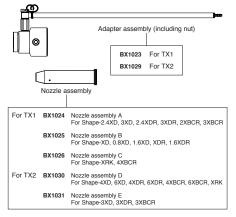

### Tip cleaner

The brush removes excess solder and flux carbides.

### All-Round Soldering Station

### SOLDERING STATION FX-888D

- Features Adjustment mode, Preset mode, and Password function
- Separable tip/heater design provides superior cost performance.
- L type (Large type) soldering iron FX-8805 is added to the lineup.

### 

# <image><section-header><complex-block>

### **Common features**

### Strict temperature management

### Digital display

FX-888D's and FX-889's digital display makes it easy to check the set temperature at a glance.

### Password function

Settings can be locked using a password to prevent them from being changed unexpectedly.

### Preset mode

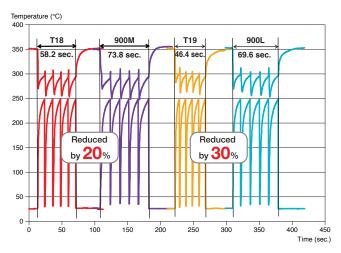

Simply select the desired temperature from a selection of preset temperatures registered in advance. (Up to 5 preset temperatures can be registered.)

### Adjustment mode

With adjustment mode, what used to be a troublesome procedure is now as simple as entering the measured tip temperature in FX-888D and FX-889.

• FX-888D and FX-889 deliver excellent thermal recovery by using T18 and T19 series tips for their terrific heat conductivity.

### Test criteria

Measurement method	Thermocouples are mounted on the tip and the soldered portion on the board, and the time until the soldered portion reaches 250°C is measured for 5 points.
Board	Paper phenol copper board
Component used	Terminal
Tip shape	Shape-2.4D
Temperature setting	350°C
Solder	Lead-free solder (Sn/Ag/Cu), diameter: 0.5 mm

### **All-Round Soldering Station and Accessories**

### Features of FX-889

### **User-Friendly Design**

• Space-saving design The reduced foot print is smaller than 2 of FX-888D and its iron holder.

Efficient setup is available even on smaller workbench.

Independent switches cut the power for each iron when not in use. Power-saving design minimizes standby electricity.

### Superior operability

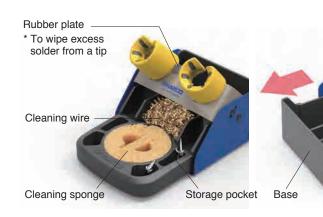

Four buttons were symmetrically placed at the both sides on the front panel. The two buttons on each side allow simple and intuitive operation.

A color band can be attached to the handle, and this makes it possible to see at a glance which side it is connected to. (2 pieces of color band are included as the standard accessories.)

### • Rich functions of iron holder

- Convenient pockets to stock soldering tips
- Three different ways for tip cleaning with provided cleaning tools
- Simple and easy cleaning of iron holder inside by removing holder base

### 🎸 GOOD DESIGN

- Provides the heat to the tip effectively by an 'Induction heater'
- Unique "Power assist" feature that assists the thermal recovery performance of the soldering iron tip
- No calibration is required
- Wide variety of tips available
- Meets or exceeds IPC J-STD-001 and ANSI ESD S20.20.

### **Features**

### IH (induction heater) for excellent thermal efficiency. Ideal for the most challenging soldering jobs.

FX-100 features IH (induction heater) that continuously powers the soldering iron and maintains the set temperature by automatically detecting even minute drops in temperature, plus HAKKO's proprietary "Power Assist" function.

FX-100 achieves powerful thermal recovery even with fine-shaped tips.

It provides excellent thermal responsiveness that conventional IH and sensor feedback systems cannot offer.

FX-780

N<sub>2</sub> Generator

#### for LEAD FREE RoHS

- Highest concentration of nitrogen
   gas: 99.9%
- Compact design reduces footprint.
- Large-capacity type accepts 2 soldering irons (FX-781).

# N<sub>2</sub> Flowmeter

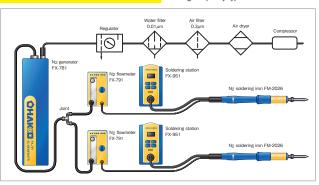

- for LEAD FREE RoHS
- Flowmeter for N<sub>2</sub> soldering iron with flow control valve and regulator

- The preheating effect is achieved by passing Nitrogen gas along the heating element in the hand piece.
- Improvement of wettability and spreadability
- Preventing oxidation

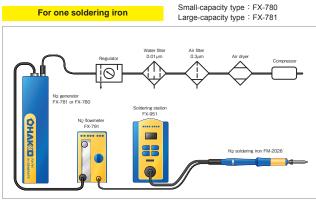

## Connection Method

For two soldering irons

Large-capacity type : FX-781

\* It is capable to supply high concentration Nitrogen of 97% at the output rate approx. 1L /min. (at air supply pressure of 0.5MPa)

\* It is capable to supply high concentration Nitrogen of 99.9% at the output rate approx. 1L /min. (at air supply pressure of 0.7MPa)

## Effects of N<sub>2</sub> system

Heated N<sub>2</sub> gas discharged from the tip end produces three effects. As a result, solderability increases, which allows you to enjoy the following advantages.

 Compatible with no-clean soldering (low-activity flux)

 Solves the insufficient heat supply problems which may occur during soldering of multilayer boards •Reduces tip oxidation

 Reduces soldering time •Relieves loads applied to heat-sensitive parts

## Improving wettability

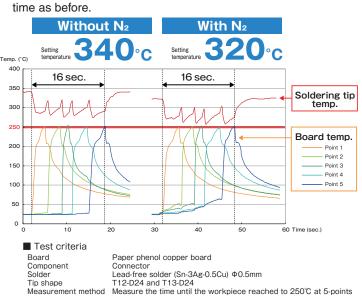

Heated N2 gas preheats P.W.B.s and shuts out oxygen. As a result, it prevents the oxidation of solder and flux and improves wettability.

#### Preheating effect

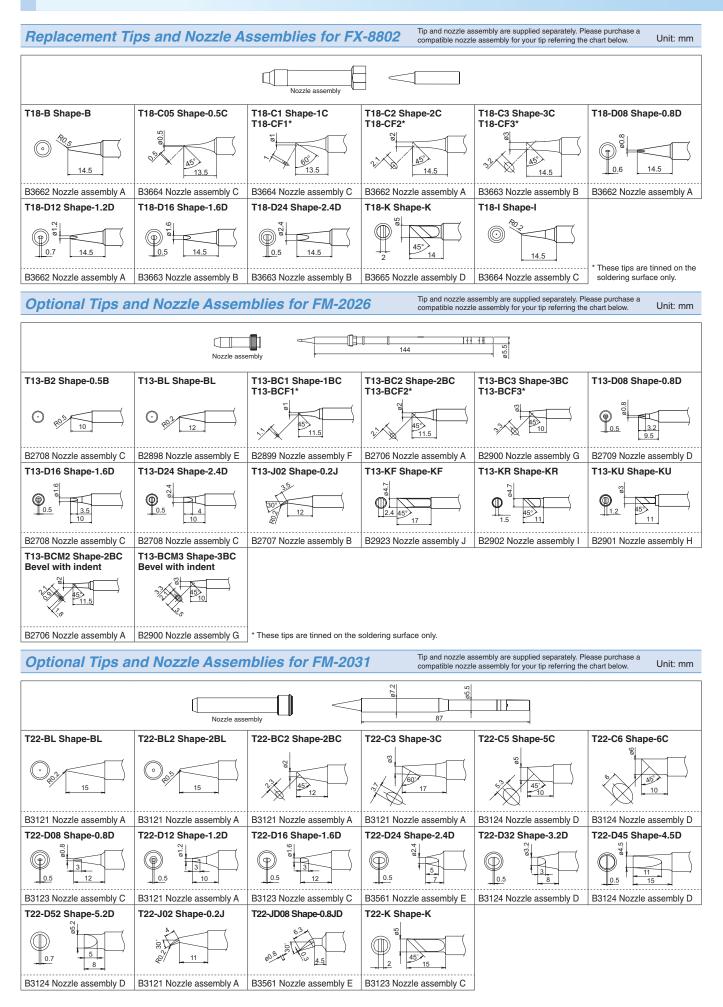

Heated N<sub>2</sub> gas preheats the workpiece. As a result, even if the temperature setting is low, soldering can be finished in the same time as before.

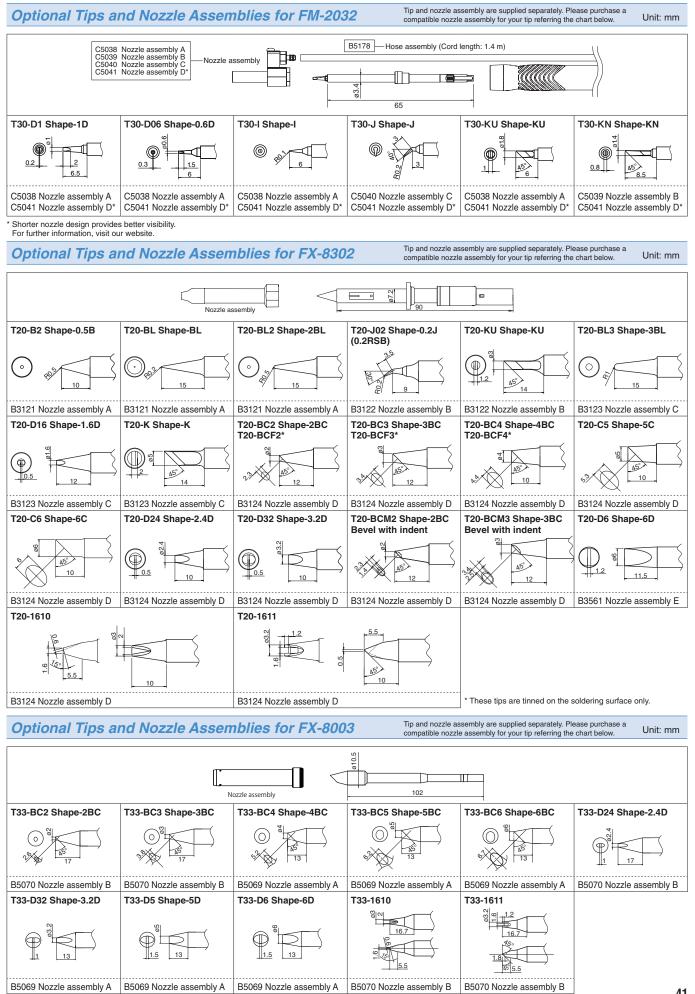

The three effects result in improved workability, quality stability and reduced running cost.

- Cutting a V-groove put on the solder surface reduces the splash of solder and flux.

V-grooved solder

Compact, space-saving automatic solder feeder

#### **Features**

#### Minimize solder and flux splash

Cutting a V-groove on the solder surface enables the release of gas pressure generated by the flux, thereby suppressing splash. HAKKO 375 can cut a groove in only the solder needed, then helps to reduce the level of defectiveness.

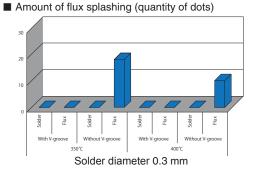

#### Advantages of V-grooved solder

#### -Examination of solder and flux splash

#### Test criteria

## Features

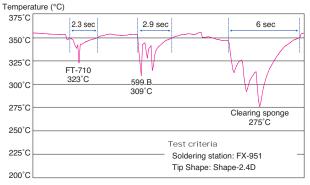

Solder-Splash prevention

#### Controllable solder removal level

Brush	Cleaning brush A (standard accessory)	Cleaning brush B (optional)
Material	Resin	Metal
Image after cleaning	Some solder remains.	Solder is completely removed.
Benefit	Prevents tip oxidation and extends the service life of the tip	Suitable for soldering small sections that require control over the amount of solder.

## Minimizes decrease in temperature of the tip during cleaning

- The solder removal level can be adjusted using two different types of brushes.
- · Brushes can be replaced without using any tools, and safe design prevents solder waste from entering the drive part.

#### Secure desoldering, valve function that suctions with high pressure

Suction starts 0.2 seconds after pulling the trigger for instance and high pressure suction to achieve complete desoldering.

#### Improvement in heating core

Heating ability for backside of heating core is increased to ensure suctioned solder be carried to filter pipe and avoid solder clogging.

#### Featuring ACF (Anti Clogging Function)

ACF ensures suctioned solder be carried to filter pipe by keeping pump running for a second after releasing trigger.

#### New type of nozzles

The new nozzles improve work efficiency with uniform heating (Only with BGA nozzles).

Efficiency improvement The high volume airflow and high output of FR-810B and FR-811 make it possible to perform the same work in only one-third of the time required when using a conventional model. This reduces the thermal impact on boards and components.

\* Please ask about correct part number to the nearest HAKKO dealer or distributor in your area.

#### Common Features of FR-810B and FR-811

#### Auto sleep and auto shutoff features

To ensure safety and conserve power, when the handpiece is placed in the handpiece holder, the auto sleep function is activated and it starts cooling automatically.

If the handpiece has not been removed from the handpiece holder (example: using it in a rework fixture) and after it has been idle for 30 minutes, auto shutoff function is activated. It is automatically powered off.

Access to settings can be restricted via the password function for easy management.

Handpiece holder No.B5048 in the picture can be attached to FR-811 as well (option).

#### Features of FR-811

Interface designed for intuitive operation. Possible to link to a PC.

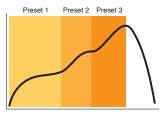

#### Preset mode

### Chain presets function for making a simple thermal profile

The chain presets function is to make a simple thermal profile by combining several preset conditions (up to 5 steps).

	Temperature (°C)	Time (s)	Airflow
Preset 1	250	100	6
Preset 2	300	40	6
Preset 3	350	50	6
Preset 4	100	000	6
Preset 5	100	000	6

\* Presets 4 and 5 have been set to "000", so they are skipped.

### The functions needed for SMD rework are in a compact body.

### Possible to make full-scale thermal profiles with 6-zone hot air and a bottom heater

A basic thermal profile is composed of the 5 parts shown below. FR-811 can provide 6 zones in which temperature, time, and airflow are controlled. Therefore FR-811 can make a full-scale thermal profile which is close to reflow profiles made by a reflow oven.

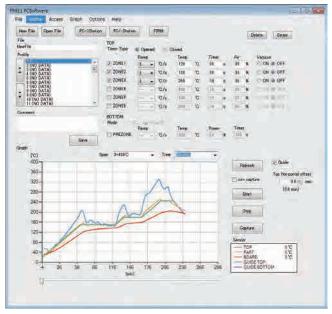

#### **Record thermal data**

By connecting a thermocouple included with FR-811, the temperature of the component or circuit board can be measured and recorded. In addition, if "TC LINK" is set, the heater output can be automatically controlled so that the temperature of the thermocouple attached to the component or circuit board follows the set profile.

#### Operation on a PC for various settings

By connecting FR-811 and a computer with a USB cable and using the dedicated software which comes as standard, a set thermal profile and actual temperature change can be shown in a graph in real time. The set values and graph can be saved in csv format.

#### Linked operation with the bottom heater

FR-811 can control on/off timing and output of the bottom heater which is available optionally.

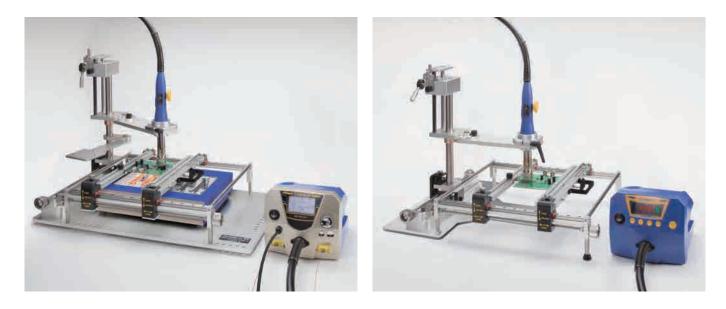

#### Common Features of FR-810B and FR-811

#### Assembly of a low-cost SMD rework system

A low cost rework system can be assembled with a bottom heater, a grip fixture, and a board holder.

\* The following pictures are set-up examples.

#### **Option**

#### **Grip Fixture L**

A board holder can be easily attached to the large baseplate.

#### **Board Holder**

Makes it easy to set and remove a P.W.B. and to make fine adjustments after setting.

#### **Grip Fixture M**

Recommended if a bottom heater is not required or in case of use of a bottom heater other than the dedicated model for FR-811.

#### **Board Clip**

Accepts even irregular-shaped P.W.B.

#### The dedicated bottom heater for FR-811

Equipped with carbon heaters. Heating area is divided into 2 sections.

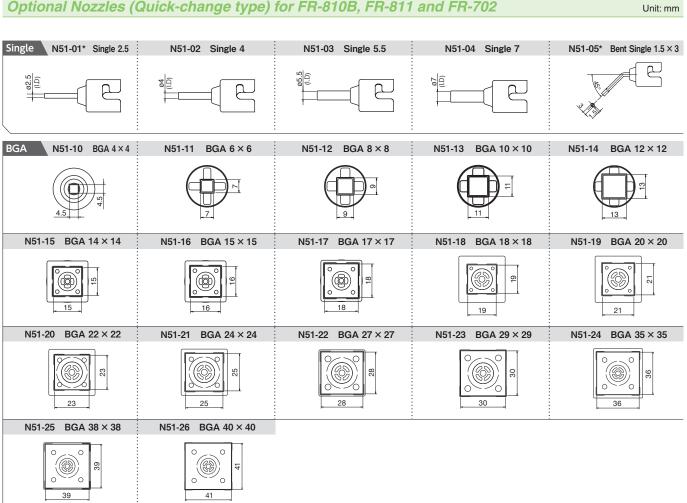

#### **Board Support Unit**

Supports P.W.B. from underneath to minimize its warping.

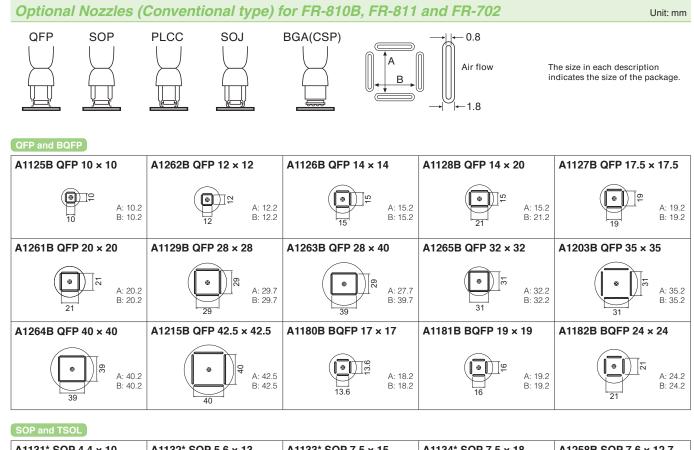

\* The vacuum function does not operate with these nozzles.

#### Flexible ducts and compact body for perfect placement

### Movement of smoke is affected by the surrounding environment

If the duct is mounted at an angle above the workpiece, it is affected by air conditioning.

If the duct is mounted directly above, it can be difficult to see the workpiece. Recommended angle

Duct is mounted on the worktable to provide excellent suction performance.

### HAKO442B

Wrist Strap

#### **Cord Helper**

 Insert the grounding wire into the ring of the cord helper.
 Clip the cord helper to clothing as shown here.

### Wrist Strap Tester

#### Features

Can be used anywhere to quickly and easily check a variety of grounding systems.

- This antistatic wrist strap prevents the human body from becoming charged with static electricity.
- The stretchable band is easy to adjust.
- A conductive thread is used for the band lining.

#### Features

#### An Innovation in Tip Temperature Control

#### Flow chart of management

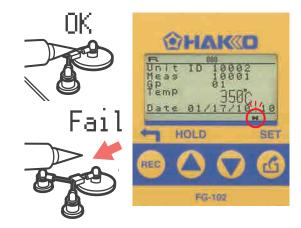

- 1. Scan the unit and the measurer's ID by a barcode reader.
- 2. Measure the temperature.
- 3. Press the REC button to save the data on the unit main body.
- 4. Transfer and save the data on the PC.

### Free of errors in temperature measurement by standardization of temperature measurement

The unit has a function to notify the end of measurement. When measurement is finished, "H" icon stops blinking. The unit can find measurement errors and prompt an operator to repeat measurement. The display shows "Fail" if tip loses appropriate contact with sensor before completion of measurement.

#### Pass/Fail judgment on measured temperature

Pass/Fail judgment on measured temperature can be automatically made if an acceptable temperature range is registered in advance (the display shows "OK" or "Fail".).

#### Make it easy to manage tip temperature records by transferring the data to computer

### **Thermometer and Soldering Tester**

# HAKOFG-100

#### **Soldering Iron Thermometer**

- Tip thermometer that provides reliable temperature control of soldering iron tips
- Compact design minimizes your workspace and enables you to easily carry it around.
- Incorporating an extremely fine sensor that has high temperature reactivity.

# SOLDERING TESTER FG-101

**Soldering Iron Tester** 

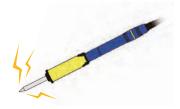

- Tip temperature, leak voltage, and tip-toground resistance can be easily measured with high accuracy.
- Soldering iron tester useful for daily maintenance of station-type soldering irons

#### What is leak voltage and tip-to-ground resistance?

Leak voltage

Leak current is the current that leaks from the tip to a board or device. Leak voltage is a specific measurement of the level of this current. The leakage can adversely affect delicate devices, so it is a

delicate devices, so it is necessary to check leak voltage on a daily basis.

#### Tip-to-ground resistance

Most leak current flows from the tip via the ground wire to the outlet ground terminal, and is prevented from affecting the device. Because of this, tip-to-ground resistance is another important issue that must be checked daily.

#### Common Features of FG-100 and FG-101

#### **Dimensional measurement**

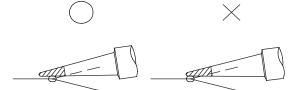

#### MAX HOLD function

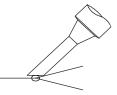

When the "MAX HOLD" button is pressed, "MAX HOLD" is displayed and the highest tip temperature is held on the display.

### Procedure for Measuring the Soldering Tip Temperature

• Typical measuring point for Shape B, I and D (Measure at the center of the tin coated area)

 Typical measuring point for Shape BC and C which are tinned flat only.

**Glue Gun** 

- Glue gun with temperature control function is applicable also to the adhesion of electronic components.
- Useful when fixing up sealing of carton boxes, dressing cases, and packages
- Only used with a stick-type adhesive that is easy to replenish (ø11.5 mm)

#### Applications

#### When using polyamide adhesives

- Reinforce and insulate soldered parts
- Fasten capacitors, resistors, etc.
- Fasten jumper wires
- ·Perform insulation potting for terminals
- ·Fasten the ends of coils
- ·Fasten deflecting yokes and variable coils

#### When using EVA adhesives

- ·Glue paper products (cardboard boxes, gift boxes, etc.)
- ·Fasten wood products
- ·Fasten plastics and metals
- ·Fasten textiles and shock absorbent packing
- •Reseal products during packaging
