

4158957  
encoder mounting kit

First the mounting kit :

this fits to the back of our motors. It consists of

3 x shaft sleeve to allow the encoder to be fitted to motors with shaft diameter 4,6 & 8 mm  
and also 1/4 inch

A two-part plastic mounting ring & base plate : this allows the encoder to be positioned to  
within 3 degrees

3 x screws to secure the mounting ring to the motor.

Second the encoder itself :

this snaps onto the mounting ring. The encoder disc is secured with a grub screw tightened by  
a hex wrench (supplied).
