

**10610**

New technology energy saving spotlamps for use in PAR16, GU10 and MR16 type fittings. Each lamp is fitted with a number (12-18) of high output LEDs. LEDs use very little electricity (less than 2 watts) but produce very effective light outputs. Isotronic LED lamps are suitable for close to medium distance illumination - reading lamps , under cupboard illumination and display cabinets. They also have the advantage of very long lifetime, typically in excess of 20,000 hours.

Bulb Type MR-16 White LED
